Are you struggling to stay abreast of the ever-changing global polyester landscape?

IHS Chemical Market Advisory Service: Global Polyester Fibers & Feedstocks (formerly CMAI’s Polyester Feedstocks & Fibers Market Advisory Service) helps clients navigate this dynamic industry by providing near-term data, analysis and forecasting for the global polyester value chain, from upstream suppliers to downstream producers and consumers. Manufacturers, raw material purchasers, strategic planners, financial analysts and end-users gain the essential insight and information needed to optimize resources, maximize profits and make sound business decisions.

The IHS Chemical Market Advisory Service Advantage:
The Global Polyester Fibers & Feedstocks service equips clients with a complete analytical package, featuring the most reliable and unbiased source of historical and forecast pricing on a global basis. Clients receive a balance of weekly and monthly reports providing market pricing and other supporting data, such as price forecasts, trade flows, supply/demand, production economics and operating schedules. At the month’s end, we deliver the Global Economy and Energy report, which contains economic updates and valuable crude oil and natural gas data. In addition, subscribers gain entry to our weekly updated On-line Pricing & Economics Database and, most importantly, enjoy direct access to IHS Chemical researchers. With industry-experienced professionals positioned around the globe, IHS Chemical provides clients comprehensive regional coverage and support in a single service.

Discover other IHS Chemical products related to your chemical of interest:
- Monthly: Near-term market fundamental data and analysis
  - IHS Chemical Market Advisory Service: Global Nylon Fibers & Feedstocks
- Annual: Long-term market fundamental data and analysis
  - IHS Chemical World Analysis: Nylon Feedstocks & Fibers
  - IHS Chemical World Analysis: Terephthalates & Polyester
Benefits of the Global Polyester Fibers & Feedstocks service include:

Weekly Market Analysis
This weekly report, also available in Chinese, provides an up-to-the-minute review of polyester feedstocks and fibers, including developments in pricing, trading ranges, margins and operating rates.

Monthly Market Summary and Data Supplement
The market summary is issued at the beginning of each month. It contains price forecasts for major polyester fibers and their upstream feedstocks for the US, Western Europe and the Far East. It also reviews operating changes, trade flows, process economics, near-term supply/demand and key market events. In addition, clients receive a monthly data supplement that details international trade statistics, supply/demand, pricing/production economics and plant operating schedules.

Products covered include: Paraxylene, Monoethylene Glycol - Fiber Grade (MEG), Terephthalic Acid (PTA), Dimethyl Terephthalate (DMT), Polyester [Spinning Chip; Fiberfill and Textile Staple; Textile and Industrial Filament] and Cotton.

Global Economy and Energy report
Clients receive this report at the end of each month. It contains discussion of global and regional economic trends, valuable crude oil and natural gas data, as well as insightful commentary from IHS Chemical consultants.

On-line Pricing & Economics Database
Clients receive a unique username and password to the IHS Chemical website that allows access to our pricing and economics database. This powerful tool is available to clients from any location and is updated weekly with the most current price forecast and cash margin data available. Clients also enjoy unlimited downloads of past issues of monthly PDF reports and other key data tables.

Access to Researchers
The service includes a reasonable amount of access to IHS Chemical's experienced industry professionals for market advice related to the global polyester industry. Furthermore, any data or graphic contained in the monthly reports can be emailed to clients upon request.
