

Industrial Gases Reports Suite

The Industrial Gases Reports Suite Includes:

For additional details, click on the report title below:

- CEH Acetylene
- CEH Air Separation Gases
- CEH Calcium Carbide
- CEH Carbon Dioxide
- CEH Helium
- CEH Hydrogen

- Do you need to understand the global supply/demand outlook for industrial gases?
- Do you need to know how the key producers of industrial gases are evolving in the major regions of the world?
- Do you need to understand important trends and strategic issues affecting the industrial gases industry?

The industrial gases industry has experienced strong growth due to improving economies, increased energy demand, climate control initiatives, and healthcare needs in both developing and developed regions. The rapid expansion of infrastructure in Asian economies will consume significant quantities of industrial gases to produce large volumes of steel. The growing need for alternate sources of energy will be met by large-scale gasification plants and gas-to-liquids, coal-to-liquids and coal-to-chemicals plants which will require enormous quantities of oxygen. Regulatory demands for cleaner fuels from the transportation sector will drive the demand for hydrogen while the oil recovery activities will see increasing quantities of carbon dioxide utilized.

IHS Markit helps industrial gas markets understand drivers, industry dynamics and key players by providing a comprehensive overview that supports strategic decision making.

IHS Markit is a world leader in critical information, analytics and expertise. Publishing continuously since 1950, our chemical solutions provide timely information and market analysis of the international chemical industry and its major products. The Industrial Gases Reports Suite is available as a subscription with inquiry privileges.

CEH (Chemical Economics Handbook) reports include:

- Global summary; regional coverage
- Producers with annual capacities and plant sites
- Production figures and trends
- Consumption and forecasts by end use application
- Prices and price trends
- Trade – imports and exports
