PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	3
	Industry Status	3
	General Aspects	11
	Technical Aspects	16
3	OXIDATION OF CYCLOHEXANE--CONVENTIONAL PROCESSES	21
	Introduction	21
	Oxidation	22
	Oxidation Reactors	26
	Heat Economy	28
	Peroxide Decomposition	29
	Product Work-Up	30
	Cost Estimates	34
	Stamicarbon Process Description	38
	Raw Materials and Utilities	39
	Costs	43
4	OXIDATION OF CYCLOHEXANE--BORIC ACID MODIFIED	47
	Introduction	47
	Oxidation	48
	Catalysts	49
	Water Control	50
	Solids Control	51
	Oxidation Reactors	52
	Control of Peroxides	53
	Heat Economy	54
	Hydrolysis	55
	Recovery and Dehydration of Boric Acid	56
	Product Work-Up	60
	Materials of Construction	61
5	SCIENTIFIC DESIGN PROCESS	63
	Process Description	63
	Process Discussion	70
	Costs	72
	Comparison of Processes	76

CONTENTS

6	IFP PROCESS	77
	Process Description	77
	Process Discussion	84
	Costs	85
7	ADIPIC ACID BY NITRIC ACID OXIDATION OF INTERMEDIATES . . .	91
	Introduction	91
	Oxidation	91
	Product Work-Up	95
	Purification of Adipic Acid	99
	Catalyst Recovery	100
	Cost Estimates	101
8	BY-PRODUCT WORK-UP	105
	Introduction	105
	Scott Oxanon Effluent Recovery Process	106
	DBA Recovery	111
	Process Description	111
	Costs	119
9	COMPARISON OF PROCESSES AND COMPLETE PLANTS	123
	Production of KA Oil	123
	Production of Adipic Acid	125
10	OTHER PROCESSES	143
	Phenol Hydrogenation	143
	Adipic Acid by Air Oxidation of Intermediates	144
	Miscellaneous Processes	145
APPENDIX A	DESIGN AND COST BASIS	149
APPENDIX B	PHYSICAL DATA	155
APPENDIX C	RAW MATERIALS AND PRODUCT SPECIFICATION	171
APPENDIX D	HEALTH AND SAFETY	173
CITED REFERENCES	175
SUPPLEMENTARY REFERENCES	203
PATENT REFERENCE BY COMPANY	207

ILLUSTRATIONS

3.1	Stamicarbon Process for KA Oil by Oxidation of Cyclohexane	41
5.1	Scientific Design Process	67
6.1	IFP Process for KA Oil	79
8.1	Scott Oxanon Effluent Recovery Process	109
8.2	Recovery of By-Products from Adipic Acid Manufacture . .	115
9.1	KA Oil Production--Battery Limits Investment (Excluding Royalties) all Adjusted to CE Index of 133	124
9.2	Effect of Cyclohexane Conversion on Overall Selectivity to Adipic Acid	126
B.1	Effect of Temperature on Distribution of H_3BO_3 Between Aqueous and Organic Phases	168
B.2	Effect of H_3BO_3 Content of Aqueous Phase on Organic Contaminants	169

TABLES

2.1	Plant Capacities The Americas	7
2.2	Plant Capacities Europe and Asia	9
2.3	Summary of Adipic Acid Processes	14
2.4	Sensitivity Analysis of Adipic Acid Processes	15
3.1	Catalysts for Cyclohexane Oxidation	23
3.2	Crude KA Oil by Oxidation of Cyclohexane Total Capital Investment	36
3.3	Crude KA Oil by Oxidation of Cyclohexane Total Production Costs	37
3.4	KA Oil by Stamicarbon Process Total Capital Investment	45
3.5	KA Oil by Stamicarbon Process Production Costs	46
5.1	KA Oil by Scientific Design Process Major Process Equipment	66
5.2	KA Oil by Scientific Design Process Utilities Summary	69
5.3	KA Oil by Scientific Design Process Total Capital Investment	73
5.4	KA Oil by Scientific Design Process Total Operating Costs	75
6.1	KA Oil by IFP Process Major Process Equipment	79
6.2	KA Oil by IFP Process Stream Flows	82
6.3	KA Oil by IFP Process	83
6.4	KA Oil by IFP Process Total Capital Investment	87
6.5	KA Oil by IFP Process Total Production Costs	89
7.1	Adipic Acid by HNO ₃ Oxidation of KA Oil Total Capital Investment	102

TABLES

7.2	Adipic Acid by HNO ₃ Oxidation of KA Oil Total Operating Costs	103
8.1	Recovery of By-Products from Adipic Acid Manufacture Major Process Equipment	114
8.2	Recovery of By-Products from Adipic Acid Manufacture Stream Flows	117
8.3	Recovery of By-Products from Adipic Acid Manufacture Utilities Summary	118
8.4	Recovery of By-Products from Adipic Acid Manufacture Total Capital Investment	121
8.5	Recovery of By-Products from Adipic Acid Manufacture Total Production Costs	122
9.1	Adipic Acid Manufacture from Cyclohexane by Oxidation of Cyclohexane (Conventional) and HNO ₃ Oxidation of Crude KA	128
9.2	Adipic Acid Manufacture from Cyclohexane and Oxidation of Cyclohexane (Conventional) and HNO ₃ Oxidation of Crude KA	129
9.3	Adipic Acid Manufacture from Cyclohexane by Oxidation of Cyclohexane (Conventional) and HNO ₃ Oxidation of Crude KA Production Costs	130
9.4	Adipic Acid Manufacture from Cyclohexane by Stamicarbon Process and HNO ₃ Oxidation of KA Oil Utilities Summary	132
9.5	Adipic Acid Manufacture from Cyclohexane by Stamicarbon Process and HNO ₃ Oxidation of KA Oil Total Capital Investment	133
9.6	Adipic Acid Manufacture from Cyclohexane by Stamicarbon Process and HNO ₃ Oxidation of KA Oil Production Costs	134
9.7	Adipic Acid Manufacture from Cyclohexane by IFP Process and HNO ₃ Oxidation of KA Oil Utilities Summary	136

TABLES

9.8	Adipic Acid Manufacture from Cyclohexane by IPF Process and HNO ₃ Oxidation of KA Oil Total Capital Investment	137
9.9	Adipic Acid Manufacture from Cyclohexane by IFP Process and HNO ₃ Oxidation of KA Oil Production Costs	138
9.10	Adipic Acid Manufacture from Cyclohexane by Scientific Design Process and HNO ₃ Oxidation of KA Oil Utilities Summary	139
9.11	Adipic Acid Manufacture from Cyclohexane by Scientific Design Process and HNO ₃ Oxidation of KA Oil Total Capital Investment	140
9.12	Adipic Acid Manufacture from Cyclohexane by Scientific Design Process and HNO ₃ Oxidation of KA Oil Production Costs	141
B.1	Properties of Some Dibasic Acids and Anhydrides	157
B.2	Mutual Solubility in the Ternary Systems Cyclohexane-Formic Acid-Water, Cyclohexane-Acetic Acid-Water, Cyclohexane-Propionic Acid-Water, Cyclohexane-n-Butyric Acid-Water, and Cyclohexane-n-Valeric Acid-Water at 65°C	161
B.3	Coefficients of Equations for the Water-Cyclohexane-Monocarboxylic Acid Systems Studied	164
B.4	Effect of Pressure on the Ternary Heteroazeotrope of Cyclohexanol, Cyclohexanone, and Water	164
B.5	Effect of Pressure on the Heteroazeotrope of Cyclohexanol and Water	165
B.6	Effect of Pressure on the Heteroazeotrope of Cyclohexanone and Water	165
