

Report No. 9

TEREPHTHALIC ACID AND DIMETHYL TEREPHTHALATE

by LLOYD M. ELKIN

contributions by SHIGEYOSHI TAKAOKA

February 1966

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

I	INTRODUCTION	1
II	SUMMARY	3
III	INDUSTRY STATUS	11
IV	CHEMISTRY	21
	Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene	21
	Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator	24
	Terephthalic Acid from Phthalic Anhydride	26
	Terephthalic Acid by Nitric Acid Oxidation of p-Xylene	28
	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications	29
	First Oxidation	29
	First Esterification	32
	Second Oxidation	33
	Second Esterification	35
V	PROCESSES FOR THE PRODUCTION OF TEREPHTHALIC ACID	37
	Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene	37
	Review of Processes	37
	Basic Patents	37
	Raw Materials	37
	Catalysts	37
	Promoters	38
	Solvents	38
	Reactor Design and Reaction Conditions	39
	Separation of Products	40
	Purification	40
	Catalyst Recovery	42

CONTENTS

V (continued)

Process Description for Crude Acid Production	42
Process Discussion for Crude Acid Production	48
Process Description and Discussion for Purification of Crude Acid	49
Cost Estimates	55
Capital Costs	55
Production Costs	59
Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator	59
Review of Processes	59
Production of Crude Terephthalic Acid	59
Purification of Crude Terephthalic Acid	65
Process Description	65
Process Discussion	73
Capital Costs	75
Production Costs	75
Terephthalic Acid from Phthalic Anhydride	79
Review of Processes	79
Raw Materials	79
Catalysts	79
Reactor Conditions and Design	85
Work-Up of Reactor Products	85
Other Process Details	85
Process Description	86
Process Discussion	93
Capital Costs	94
Production Costs	94
Terephthalic Acid by Nitric Acid Oxidation of p-Xylene	98
Review of Processes	98
Process Description	103
Process Discussion	110
Capital Costs	110
Production Costs	110

CONTENTS

V (continued)

Dimethyl Terephthalate by Esterification of Terephthalic Acid	114
Review of Processes	114
Process Description	117
Process Discussion	125
Feed Treatment Section	125
Reactor Section	125
Methanol Recovery Section	126
Product Distillation Section	126
Capital Costs	126
Production Costs	129
Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications	129
Review of Processes	129
Production of Crude Dimethyl Terephthalate	129
Purification of Dimethyl Terephthalate	134
Process Description	134
Process Discussion	145
Capital Costs	146
Production Costs	149
Other Processes	149
Oxidation with Nitrogen Dioxide	149
Oxidation with Sulfur Dioxide	149
Decarboxylation of Trimellitic Acid	151
Reaction with Sodium Metal and Carbon Dioxide	151
Reaction with Alkali Metal Alkyl Carbonate	152
Oxidation in Alkaline Solution	152
Oxidation in Alkaline Solution in Presence of Catalyst	152
Oxidation with Sodium Hypochlorite	153
Oxidation with Sulfur Compounds	153

CONTENTS

APPENDIX A	Design and Cost Basis	155
APPENDIX B	Physical Data	159
APPENDIX C	Raw Material and Product Specifications	163
APPENDIX D	Handling and Safety	167
Cited References	169
Supplementary References	183

ILLUSTRATIONS

1	Crude Terephthalic Acid by Bromine-Promoted Air Oxidation of p-Xylene	43
2	Purification of Crude Terephthalic Acid	51
3	Crude Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator	67
4	Crude Terephthalic Acid from Phthalic Anhydride	87
5	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene .	105
6	Dimethyl Terephthalate by Esterification of Terephthalic Acid	119
7	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications	137

TABLES

1	Summary of Economics of Evaluated Processes	4
2	Summary of Processes Evaluated	7
3	Plant Capacities, Americas	13
4	Plant Capacities, Western Europe	15
5	Plant Capacities, Asia	17
6	Crude Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene Major Process Equipment List	43
7	Crude Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene Stream Flows	45
8	Purification of Crude Terephthalic Acid Major Process Equipment List	51
9	Purification of Crude Terephthalic Acid Stream Flows	53
10	Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene Utilities Summary	56
11	Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene Process Unit and Utilities Investment	57
12	Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene Total Capital Investment	58
13	Terephthalic Acid by Bromine-Promoted Catalytic Air Oxidation of p-Xylene Production Costs	60
14	Crude Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator Summary of Processes	63

TABLES

15	Crude Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator Major Process Equipment List	67
16	Crude Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator Stream Flows	69
17	Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator Utilities Summary	71
18	Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator Process Unit and Utilities Investment	76
19	Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator Total Capital Investment	77
20	Terephthalic Acid by Catalytic Oxidation of p-Xylene in the Presence of Methyl Ethyl Ketone Activator Production Costs	78
21	Crude Terephthalic Acid from Phthalic Anhydride Summary of Processes	81
22	Crude Terephthalic Acid from Phthalic Anhydride Major Process Equipment List	87
23	Crude Terephthalic Acid from Phthalic Anhydride Stream Flows	89
24	Crude Terephthalic Acid from Phthalic Anhydride Utilities Summary	91
25	Crude Terephthalic Acid from Phthalic Anhydride Process Unit and Utilities Investment	95
26	Crude Terephthalic Acid from Phthalic Anhydride Total Capital Investment	96

TABLES

27	Crude Terephthalic Acid from Phthalic Anhydride Production Costs	97
28	Terephthalic Acid from Phthalic Anhydride Production Costs	99
29	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Summary of Processes	101
30	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Major Process Equipment List	105
31	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Stream Flows	107
32	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Utilities Summary	109
33	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Process Unit and Utilities Investment	111
34	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Total Capital Investment	112
35	Crude Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Production Costs	113
36	Terephthalic Acid by Nitric Acid Oxidation of p-Xylene Production Costs	115
37	Dimethyl Terephthalate by Esterification of Terephthalic Acid Major Process Equipment List	118
38	Dimethyl Terephthalate by Esterification of Terephthalic Acid Stream Flows	121
39	Dimethyl Terephthalate by Esterification of Terephthalic Acid Utilities Summary	123
40	Dimethyl Terephthalate by Esterification of Terephthalic Acid Process Unit and Utilities Investment	127

TABLES

41	Dimethyl Terephthalate by Esterification of Terephthalic Acid Total Capital Investment	130
42	Dimethyl Terephthalate by Esterification of Terephthalic Acid Production Costs	131
43	Purification of Dimethyl Terephthalate Summary of Processes	135
44	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications Major Process Equipment List	136
45	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications Stream Flows	139
46	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications Utilities Summary	143
47	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications Process Unit and Utilities Investment	147
48	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications Total Capital Investment	148
49	Dimethyl Terephthalate from p-Xylene by Successive Oxidations and Esterifications Production Costs	150
