MENLO PARK, CALIFORNIA

## CONTENTS

---

I	INTRODUCTION . . . . .	1
II	SUMMARY . . . . .	3
III	INDUSTRY STATUS . . . . .	13
IV	CHEMISTRY OF ACETYLENE . . . . .	27
	Introduction . . . . .	27
	Thermal Cracking . . . . .	28
	Partial Oxidation . . . . .	43
	Electric Arc Processes . . . . .	47
	The Quench Process . . . . .	56
V	REVIEW OF PROCESSES . . . . .	59
	Introduction . . . . .	59
	Thermal Cracking Processes . . . . .	59
	Partial Oxidation Processes . . . . .	81
	Burners . . . . .	81
	Processes . . . . .	116
	Electric Arc Processes . . . . .	140
	Other Processes . . . . .	156
	Recovery Processes . . . . .	157
	Quenching . . . . .	186
	Removal of Carbon Black . . . . .	186
	Ethylene Recovery . . . . .	188
	Materials of Construction . . . . .	189
VI	ACETYLENE FROM NAPHTHA BY THE WULFF PROCESS . . . . .	191
	Introduction . . . . .	191
	Process Description . . . . .	192
	Costs . . . . .	213
	Capital Investment . . . . .	213
	Production Costs . . . . .	215
VII	ACETYLENE FROM METHANE BY PARTIAL OXIDATION . . . . .	225
	Introduction . . . . .	225
	Process Description . . . . .	225
	Raw Materials . . . . .	229
	Process Discussion . . . . .	230

## CONTENTS

---

VII (continued)	
Costs . . . . .	246
Capital Investment . . . . .	246
Production Costs . . . . .	252
Costs for Alternate Recovery System . . . . .	258
VIII ACETYLENE FROM NAPHTHA BY PARTIAL OXIDATION . . . . .	261
Introduction . . . . .	261
Process Description . . . . .	261
Raw Materials . . . . .	263
Process Discussion . . . . .	263
Costs . . . . .	279
Capital Investment . . . . .	279
Production Costs . . . . .	285
Costs for Alternate Recovery System . . . . .	291
IX ELECTRIC ARC PROCESSES . . . . .	295
Introduction . . . . .	295
Process Description . . . . .	296
Capital Costs . . . . .	296
Production Costs . . . . .	297
Variations in Cost . . . . .	300
X COMPARISON OF PROCESSES . . . . .	305
Capital Costs . . . . .	305
Production Costs . . . . .	307
Conclusion . . . . .	315
XI GENERALIZED COST CORRELATIONS . . . . .	319
Introduction . . . . .	319
Complete Acetylene Recovery System . . . . .	319
Prepurification Section . . . . .	322
Carbon Dioxide Removal Section . . . . .	325
Acetylene Recovery Section . . . . .	328
Vacuum Processes . . . . .	330

## CONTENTS

---

Appendix A	DESIGN AND COST BASIS . . . . .	333
Appendix B	PHYSICAL DATA . . . . .	337
Appendix C	PRODUCT SPECIFICATIONS . . . . .	355
Appendix D	SAFETY . . . . .	357
REFERENCES	. . . . .	359
SUPPLEMENTARY REFERENCES	. . . . .	400

## ILLUSTRATIONS

---

1	Production and Consumption of Calcium Carbide in Japan . . .	14
2	Acetylene Production and Capacity in the United States . . .	14
3	Effect of Competing Feeds on Use of Acetylene for Some Chlorinated Hydrocarbons in the United States . . . . .	25
4	Free Energies of Formation of Various Hydrocarbons . . . . .	29
5	Heats of Formation of Various Hydrocarbons . . . . .	29
6	Experimental Conversion Rate Constants for Various Hydrocarbons . . . . .	31
7	Rate Constants for Six Major Reactions . . . . .	37
8	Effect of Hydrogen Dilution of Methane Cracking . . . . .	38
9	Methane Pyrolysis to Acetylene At 100 mm Hg Pressure, Single Pass . . . . .	40
10	Propane Cracking in Wulff Pilot Plant . . . . .	41
11	Light Naphtha Cracking in Wulff Pilot Plant . . . . .	42
12	Reaction Profile for Naphtha Cracking . . . . .	44
13	Equilibrium of the Partial Oxidation Process . . . . .	45
14	Typical Characteristic Curve of a Gaseous Discharge . . . .	48
15	Equilibria in the Carbon-Hydrogen System . . . . .	50
16	Preservation of Equilibrium in Quenching . . . . .	51
17	Effect of Temperature on Heat Content of Hydrogen . . . . .	53
18	Effect of Temperature on Energy Required to Produce Acetylene from Methane . . . . .	54
19	Effect of Specific Energy Input on Methane Conversion . . .	54
20	Decomposition Rates of Acetylene . . . . .	58
21	Wulff Furnace . . . . .	61
22	Temperature Distribution in Farbwerke Hoechst Combustion Chamber-Reactor . . . . .	84
23	SBA Burners . . . . .	85
24	Montecatini Burner . . . . .	86

## ILLUSTRATIONS

---

25	Du Pont Arc Apparatus . . . . .	142
26	Matching Power Supply and Arc Characteristics . . . . .	144
27	Acetylene from Naphtha by the Wulff Process . . . . .	199
28	Major Utility System, Wulff Process . . . . .	212
29	Effect of Capacity on Capital Cost of Wulff Process Plants . .	214
30	Effect of Naphtha and Ethylene on Production Cost of Acetylene by Wulff Process . . . . .	223
31	Effect of By-Product Gas Value on Production Cost of Acetylene by Wulff Process . . . . .	223
32	Acetylene from Methane by Partial Oxidation Process . . . . .	233
33	Effect of Capacity on Capital Cost of Acetylene Production from Methane by Partial Oxidation . . . . .	247
34	Effect of Raw Materials and By-Products on Production Cost of Acetylene from Methane by Partial Oxidation . . . . .	257
35	Acetylene from Naphtha by Partial Oxidation . . . . .	265
36	Major Utility System, Naphtha Partial Oxidation Process . . .	276
37	Effect of Capacity on Capital Cost of Naphtha Partial Oxidation Plants . . . . .	284
38	Effect of Raw Material and By-Products on the Production Cost of Acetylene from Naphtha by Partial Oxidation . . . . .	289
39	Capital Cost of Plant to Produce Acetylene from Methane by Electric Arc Cracking . . . . .	301
40	Effect of Power Supply Cost on Production Cost of Acetylene from Methane by Electric Arc Cracking . . . . .	301
41	Effect of Electrical Power on Acetylene Production Cost . . .	302
42	Contribution of Electrical Power to Acetylene Cost . . . . .	303
43	Comparison of Capital Costs of Acetylene Plants . . . . .	306
44	Effect of Capacity on Capital Cost of Acetylene from Naphtha Plants . . . . .	306
45	Differences in Production Cost for Various Processes Attributable to Capital Costs . . . . .	309

## ILLUSTRATIONS

---

46	Effect of Fuel Value on Differences in Production Costs for Various Processes . . . . .	310
47	Effect of Naphtha Cost on Cost of Producing Acetylene . . .	312
48	Effect of Oxygen Cost on Cost of Producing Acetylene by Partial Oxidation Processes . . . . .	313
49	Effect of Ethylene Value on Cost of Producing Acetylene . .	313
50	Effect of Crediting Off-Gas at Other than Fuel Value . . . .	314
51	Comparison of Wulff and Methane Partial Oxidation Processes . . . . .	316
52	Effect of Acetylene Concentration on Cost of Recovering Acetylene (DMF System) . . . . .	321
53	Capital Investment for Wulff Prepurification Section . . . .	323
54	Utilities Requirements for Wulff Prepurification Section . . . . .	324
55	Process Unit and Utilities Investment for CO <sub>2</sub> Removal Section . . . . .	325
56	Process Unit Investment for CO <sub>2</sub> Removal Section . . . . .	326
57	Utilities Requirements for CO <sub>2</sub> Removal Section . . . . .	327
58	Utilities for Wulff Acetylene Recovery Section (Excluding f[C <sub>2</sub> H <sub>4</sub> ]) . . . . .	328
59	Utilities and Capital Costs Wulff Process Acetylene Recovery Section . . . . .	329
60	Effect of Quench Temperature and Pressure on Amount of Gas Handled by Compressor . . . . .	331
61	Effect of Vacuum Operation on Production Cost of Acetylene . . . . .	331

TABLES

---

1	Summary of Acetylene Processes . . . . .	6
2	Sensitivity Analysis of Acetylene Processes . . . . .	7
3	Hydrocarbon Acetylene Plant Capacities United States of America . . . . .	15
4	Hydrocarbon Acetylene Plant Capacities Europe . . . . .	17
5	Hydrocarbon Acetylene Plant Capacities Japan . . . . .	19
6	Hydrocarbon Acetylene Plant Capacities Soviet Bloc . . . . .	21
7	Summary of Patents on Thermal Cracking Apparatus . . . . .	63
8	Summary of Thermal Cracking Processes . . . . .	67
9	Processes for Production of Acetylene from Methane by Partial Oxidation . . . . .	82
10	Summary of Patents on Partial Oxidation Apparatus . . . . .	88
11	Summary of Partial Oxidation Processes . . . . .	120
12	Summary of Electric Arc Processes . . . . .	146
13	Summary of Recovery Processes . . . . .	162
14	Acetylene from Naphtha by the Wulff Processes Major Process Equipment List . . . . .	197
15	Acetylene from Naphtha by the Wulff Process Stream Flows . . . . .	205
16	Acetylene from Naphtha by the Wulff Process Utilities Summary . . . . .	211
17	Acetylene from Naphtha by the Wulff Process Process Unit and Utilities Investment . . . . .	217
18	Acetylene from Naphtha by the Wulff Process Total Capital Investment . . . . .	219
19	Acetylene from Naphtha by the Wulff Process Production Costs . . . . .	221
20	Acetylene from Methane by Partial Oxidation Major Process Equipment List . . . . .	232

TABLES
