

Report No. 24

# ACETALDEHYDE

by PARK L. MORSE

April 1967

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

## CONTENTS

---

1	INTRODUCTION . . . . .	1
2	SUMMARY . . . . .	3
3	INDUSTRIAL STATUS . . . . .	13
4	CHEMISTRY . . . . .	19
	Reactions Involving Aqueous PdCl <sub>2</sub> . . . . .	19
	Reactions Involving Aqueous CuCl <sub>2</sub> and PdCl <sub>2</sub> . . . . .	21
	Process Chemistry . . . . .	22
5	ACETALDEHYDE BY SINGLE STEP ETHYLENE OXIDATION . . . . .	25
	Review of Process Information . . . . .	25
	Raw and Process Materials (Single Step Process) . . . . .	25
	Ratio of Reactants (Single Step Process) . . . . .	31
	Catalysts (Single and Two Step Processes) . . . . .	31
	By-Products (Single and Two Step Processes) . . . . .	33
	Reaction Temperature (Single and Two Step Processes) . . . . .	33
	Reaction Pressure (Single and Two Step Processes) . . . . .	34
	Reactors (Single and Two Step Processes) . . . . .	35
	Regeneration of Aqueous Catalyst (Single and Two Step Processes) . . . . .	36
	Recovery and Purification of Products (Single and Two Step Processes) . . . . .	36
	Description of Design Case (Single Step Process) . . . . .	41
	Discussion of Design . . . . .	52
	Capital Cost . . . . .	58
	Production Costs . . . . .	61
6	ACETALDEHYDE FROM ETHYLENE BY TWO STEP OXIDATION . . . . .	65
	Review of Process Information . . . . .	65
	Raw and Process Materials (Two Step Process) . . . . .	65
	Ratio of Reactants (Two Step Process) . . . . .	65
	Description of Design Case . . . . .	66
	Discussion of Design . . . . .	78
	Capital Cost . . . . .	84
	Production Costs . . . . .	86

## CONTENTS

---

APPENDIX A	DESIGN AND COST BASIS, DEFINITIONS . . . . .	91
APPENDIX B	PHYSICAL PROPERTY AND THERMOCHEMICAL INFORMATION . . .	95
APPENDIX C	RAW MATERIAL AND PRODUCT SPECIFICATIONS . . . . .	97
APPENDIX D	HANDLING AND SAFETY . . . . .	99
APPENDIX E	DESIGN OF HIGH PRESSURE DROP REACTORS . . . . .	101
CITED REFERENCES	. . . . .	107
SUPPLEMENTARY REFERENCES	. . . . .	115

## ILLUSTRATIONS

---

4.1	Effect of pH, $\text{Cu}^{++}$ , and Cl/Cu on Absorption Rate . . . . .	23
5.1	Acetaldehyde by Single Step Process . . . . .	43
5.2	Acetaldehyde by Single Step Process Effect of Operating Level and Plant Capacity on Production Cost . . . . .	63
6.1	Acetaldehyde by Two Step Process . . . . .	69
6.2	Acetaldehyde by Two Step Process Effect of Operating Level and Plant Capacity on Production Cost . . . . .	89

## TABLES

---

2.1	Evaluation of Processes for Producing 32 million lb/yr Acetaldehyde . . . . .	7
3.1	Plant Capacities Free World . . . . .	15
3.2	Starting Materials for Acetaldehyde Processes . . . . .	17
5.1	Acetaldehyde by Ethylene Oxidation Summary of Processes . . . . .	27
5.2	Regeneration of Aqueous Catalyst Summary of Processes . . . . .	37
5.3	Recovery and Purification of Acetaldehyde Summary of Processes . . . . .	39
5.4	Acetaldehyde by Single Step Process Major Process Equipment and Utilities Summary . . . . .	42
5.5	Acetaldehyde by Single Step Process Stream Flows . . . . .	45
5.6	Acetaldehyde by Single Step Process Process Unit and Utilities Investment . . . . .	59
5.7	Acetaldehyde by Single Step Process Total Capital Investment . . . . .	60
5.8	Acetaldehyde by Single Step Process Production Costs . . . . .	62
6.1	Acetaldehyde by Two Step Process Major Process Equipment and Utilities Summary . . . . .	67
6.2	Acetaldehyde by Two Step Process Stream Flows . . . . .	71
6.3	Acetaldehyde by Two Step Process Process Unit and Utilities Investment . . . . .	85
6.4	Acetaldehyde by Two Step Process Total Capital Investment . . . . .	87
6.5	Acetaldehyde by Two Step Process Production Costs . . . . .	88
E.1	Simplified Mass Transfer Relationships for High Pressure Drop Reactors . . . . .	103
E.2	Design of High Pressure Drop Reactors . . . . .	104
