## CONTENTS

1	INTRODUCTION . . . . .	1
2	SUMMARY . . . . .	3
	General Aspects . . . . .	3
	Technical Aspects . . . . .	9
3	INDUSTRY STATUS . . . . .	15
	Ethylene . . . . .	15
	Propylene . . . . .	37
4	ETHYLENE AND PROPYLENE BY PYROLYSIS OF LIGHT AND MIDDLE HYDROCARBONS IN A FIRED TUBULAR HEATER . . . . .	41
	Chemistry . . . . .	41
	Reaction Mechanisms . . . . .	41
	Reaction Rate Constants . . . . .	44
	Reaction Variables . . . . .	46
	Review of Processes . . . . .	47
	Design Case for Pyrolysis of Gas Oil . . . . .	57
	Process Description . . . . .	57
	Process Discussion . . . . .	67
	Cost Estimates . . . . .	69
	Capital Costs . . . . .	69
	Production Costs . . . . .	70
	Cost Comparisons . . . . .	70
5	ETHYLENE AND PROPYLENE FROM CRUDE OIL . . . . .	79
	Review of Processes . . . . .	79
	Thermal Cracking Using Heat Carriers . . . . .	79
	Autothermic Cracking . . . . .	87
	Catalytic Cracking . . . . .	88
	Arc Cracking . . . . .	89
	Design Case for Autothermic Cracking in a Forced-Circulating Fluidized Bed . . . . .	89
	Process Description . . . . .	89
	Process Discussion . . . . .	103
	Cost Estimates . . . . .	106
	Capital Costs . . . . .	106
	Production Costs . . . . .	107

## CONTENTS

6	ETHYLENE BY OTHER PROCESSES . . . . .	119
	Autothermic Cracking of Other than Crude Oil . . . . .	119
	Catalytic Cracking of Other than Crude Oil . . . . .	120
	Propylene Disproportionation . . . . .	125
	Ethane Dehydrogenation . . . . .	126
7	PROPYLENE BY CATALYTIC DEHYDROGENATION OF PROPANE . . . . .	131
	Chemistry . . . . .	131
	Review of Processes . . . . .	135
	Process Description . . . . .	136
	Process Discussion . . . . .	144
	Cost Estimates . . . . .	146
	Capital Costs . . . . .	146
	Production Costs . . . . .	147
8	PROPYLENE BY OXIDATIVE DEHYDROGENATION OF PROPANE . . . . .	155
	Chemistry . . . . .	155
	Dehydrogenation by Oxygen . . . . .	155
	Dehydrogenation by Halogens . . . . .	156
	Dehydrogenation by Sulfur . . . . .	156
	Review of Processes . . . . .	158
	Using Oxygen . . . . .	161
	Using Halogens . . . . .	163
	Using Sulfur . . . . .	166
	Using Carbon Monoxide . . . . .	168
	Design Case Using Iodine . . . . .	168
	Process Description . . . . .	168
	Process Discussion . . . . .	177
	Cost Estimates . . . . .	180
	Capital Costs . . . . .	180
	Production Costs . . . . .	181
9	PROPYLENE BY OTHER PROCESSES . . . . .	189
	Thermal Cracking of Isobutane . . . . .	189
	Catalytic Cracking of Paraffinic Hydrocarbons . . . . .	194
	Oxidative Cracking of Isopentane . . . . .	195
	Catalytic Conversion of Ethylene . . . . .	197
	Hydrogen Transfer from Propane to Ethylene . . . . .	198
	Disproportionation Reaction Between Ethylene and Butene-2 . . . . .	198
	Other Processes . . . . .	199

## CONTENTS

10	RECOVERY AND PURIFICATION OF ETHYLENE AND PROPYLENE . . . . .	201
	Quenching . . . . .	201
	Nitric Oxide Removal . . . . .	203
	Water Removal . . . . .	203
	Acetylenic Materials Removal . . . . .	204
	Demethanization . . . . .	207
	Ethylene Purification . . . . .	208
	Propylene Purification . . . . .	208
	APPENDIX A DESIGN AND COST BASIS AND DEFINITIONS . . . . .	211
	APPENDIX B PHYSICAL DATA . . . . .	217
	APPENDIX C PRODUCT SPECIFICATIONS AND BY-PRODUCTS COMPOSITIONS .	221
	APPENDIX D STORAGE, TRANSPORTATION, AND WASTE DISPOSAL . . . . .	225
	CITED REFERENCES . . . . .	231
	PATENT REFERENCES BY COMPANY . . . . .	265

## ILLUSTRATIONS

4.1	Reaction Velocity Constants for Heavy Hydrocarbons Relative to n-Pentane . . . . .	45
4.2	Ethylene by Pyrolysis of Gas Oil in a Fired Tubular Heater . . . . .	59
4.3	Ethylene by Pyrolysis of n-Butane in a Fired Tubular Heater Block Flow Diagram and Material Balance . . . . .	66
4.4	Ethylene by Pyrolysis of Gas Oil in A Fired Tubular Heater Effect of Ethylene Yield in Furnace Effluent on Capital Cost . . . . .	73
4.5	Ethylene by Pyrolysis of Gas Oil in A Fired Tubular Heater Effect of Gas Oil Price and By-Product Credit on Net Production Cost . . . . .	75
4.6	Ethylene by Pyrolysis of Gas Oil in a Fired Tubular Heater Effect of Operating Level and Plant Capacity on Net Production Cost . . . . .	76
4.7	Ethylene by Pyrolysis of Gas Oil in A Fired Tubular Heater Effect of Ethylene Yield in Furnace Effluent on Production Cost . . . . .	77
5.1	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process . . . . .	95
5.2	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Effect of Yield on Capital Cost . . . . .	111
5.3	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Effect of Capital on Capital Cost . . . . .	112
5.4	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Effect of Raw Materials Cost and By-Products Credit on Production Cost . . . . .	115
5.5	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Effect of Operating Level and Plant Capacity on Production Cost . . . . .	116
5.6	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Effect of Yield on Production Cost . . . . .	117

## ILLUSTRATIONS

7.1	Propylene by Catalytic Dehydrogenation of Propane Effect of Propane Conversion on Selectivity to Propylene . .	134
7.2	Propylene by Catalytic Dehydrogenation of Propane . . . . .	141
7.3	Propylene by Catalytic Dehydrogenation of Propane Effect of Propane Price on Net Production Cost . . . . .	153
7.4	Propylene by Catalytic Dehydrogenation of Propane Effect of Operating Level and Plant Capacity on Net Production Cost . . . . .	154
8.1	Propylene by Oxidative Dehydrogenation of Propane . . . . .	173
8.2	Propylene by Oxidative Dehydrogenation of Propane Effect of Propane Price and Benzene Credit on Net Production Cost . . . . .	187
8.3	Propylene by Oxidative Dehydrogenation of Propane Effect of Operating Level and Plant Capacity on Net Production Cost . . . . .	188
9.1	Propylene by Catalytic Cracking of Light Naphtha Effect of Temperature on Yield . . . . .	196
B.1	Heat of Formation of Hydrocarbons . . . . .	219
D.1	Erected Cost of Ethylene Storage Tanks . . . . .	226
D.2	Costs of Ethylene Transportation by Tanker . . . . .	228

TABLES

2.1	Summary of Ethylene Processes . . . . .	5
2.2	Summary of Propylene Processes . . . . .	8
3.1	Ethylene and Propylene Plant Capacities, United States . . . . .	17
3.2	Ethylene and Propylene Plant Capacities, Americas (except United States) . . . . .	21
3.3	Ethylene and Propylene Plant Capacities, Europe . . . . .	23
3.4	Ethylene and Propylene Plant Capacities, Asia, Australia, and Africa . . . . .	29
3.5	Ethylene and Propylene Plant Capacities, Soviet Bloc Countries . . . . .	33
4.1	Typical Yield Structures from Fired Tubular Heaters . . . . .	49
4.2	Ethylene and Propylene by Pyrolysis in a Fired Tubular Heater Patent Summary . . . . .	53
4.3	Ethylene by Pyrolysis of Gas Oil in a Fired Tubular Heater Utilities Summary . . . . .	58
4.4	Ethylene by Pyrolysis of Gas Oil in a Fired Tubular Heater Stream Flows . . . . .	65
4.5	Ethylene by Pyrolysis of Gas Oil in a Fired Tubular Heater Total Capital Investment . . . . .	72
4.6	Ethylene by Pyrolysis of Gas Oil in a Fired Tubular Heater Production Costs . . . . .	74
4.7	Ethylene by Pyrolysis in a Fired Tubular Heater Production Costs Comparison for n-Butane and Propane Processes . . . . .	78
5.1	Ethylene and Propylene from Crude Oil Patent Summary . . . . .	81
5.2	Ethylene and Propylene from Crude Oil Typical Processes . . . . .	85
5.3	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Major Process Equipment and Utilities Summary . . . . .	95

TABLES

5.4	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Stream Flows . . . . .	101
5.5	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Total Capital Investment . . . . .	109
5.6	Ethylene from Crude Oil by Forced-Circulating Fluidized Bed Process Production Costs . . . . .	113
6.1	Ethylene by Autothermic Cracking Patent Summary . . . . .	121
6.2	Ethylene by Catalytic Cracking Patent Summary . . . . .	123
6.3	Ethylene by Disproportionation of Propylene Patent Summary . . . . .	127
6.4	Ethylene by Dehydrogenation of Ethane Patent Summary . . . . .	129
7.1	Propylene by Catalytic Dehydrogenation of Propane Patent Summary . . . . .	137
7.2	Propylene by Catalytic Dehydrogenation of Propane Major Process Equipment and Utilities Summary . . . . .	141
7.3	Propylene by Catalytic Dehydrogenation of Propane Stream Flows . . . . .	143
7.4	Propylene by Catalytic Dehydrogenation of Propane Total Capital Investment . . . . .	149
7.5	Propylene by Catalytic Dehydrogenation of Propane Production Costs . . . . .	151
8.1	Propylene by Oxidative Dehydrogenation of Propane Patent Summary . . . . .	159
8.2	Propylene by Oxidative Dehydrogenation of Propane Major Process Equipment and Utilities Summary . . . . .	171
8.3	Propylene by Oxidative Dehydrogenation of Propane Stream Flows . . . . .	175
8.4	Propylene by Oxidative Dehydrogenation of Propane Total Capital Investment . . . . .	183

## TABLES

8.5	Propylene by Oxidative Dehydrogenation of Propane Production Costs . . . . .	185
9.1	Propylene by Other Processes Summary of Processes . . . . .	191
B.1	Heats of Formation of the Vapor for Selected Compounds at 1520°F . . . . .	218
C.1	Ethylene Specifications . . . . .	221
C.2	Propylene Specifications . . . . .	222
C.3	Composition of Pyrolysis Gasoline . . . . .	223
C.4	Composition of C <sub>4</sub> Fraction Obtained in Naphtha Pyrolysis . .	224
C.5	Composition of C <sub>5</sub> Fraction Obtained in Naphtha Pyrolysis . .	224
