## CONTENTS

1	INTRODUCTION . . . . .	1
2	SUMMARY . . . . .	3
	Consumption, Uses, and Prices . . . . .	3
	Production Processes . . . . .	4
	Technical Considerations . . . . .	7
	Conclusions . . . . .	14
3	INDUSTRY STATUS . . . . .	15
	Hydrogen Consumption . . . . .	15
	Hydrogen Sources . . . . .	18
	Hydrogen Values . . . . .	35
	Liquid Hydrogen . . . . .	36
	The Hydrogen Economy . . . . .	38
4	CHEMISTRY . . . . .	41
	Catalytic Steam Reforming of Hydrocarbons . . . . .	41
	Carbon Deposition . . . . .	41
	Reaction Kinetics . . . . .	43
	Partial Oxidation of Hydrocarbons . . . . .	44
	Decomposition of Hydrocarbons . . . . .	46
	Thermodynamics and Kinetics of Carbon Gasification . . . . .	48
	Carbon Monoxide Shift Conversion . . . . .	49
	Hydrogen Diffusion in Palladium . . . . .	55
	Ortho- and para-Hydrogen . . . . .	56
5	HYDROGEN BY CATALYTIC STEAM REFORMING OF HYDROCARBONS . . . . .	59
	Review of Processes . . . . .	59
	Reforming Catalysts . . . . .	59
	Reforming Processes . . . . .	73
	Reformer Design . . . . .	86
	Process Description . . . . .	92
	Hydrogen from Natural Gas . . . . .	92
	Hydrogen from Naphtha . . . . .	100
	Process Discussion . . . . .	107
	Cost Estimates . . . . .	108
	Capital Investment . . . . .	108
	Production Costs . . . . .	109
	Discussion of Costs . . . . .	111
	Conclusions . . . . .	112

## CONTENTS

<b>6</b>	<b>HYDROGEN BY NONCATALYTIC PARTIAL OXIDATION OF HYDROCARBONS . . . . .</b>	<b>125</b>
	Review of Processes . . . . .	125
	Partial Oxidation Technology . . . . .	125
	Downstream Gas Purification . . . . .	135
	Process Description . . . . .	137
	Process Discussion . . . . .	149
	Cost Estimates . . . . .	152
	Capital Investment . . . . .	152
	Production Costs . . . . .	152
	Discussion of Costs . . . . .	153
	Conclusions . . . . .	154
<b>7</b>	<b>HYDROGEN BY CATALYTIC PARTIAL OXIDATION OF HYDROCARBONS . . . . .</b>	<b>165</b>
	Review of Processes . . . . .	165
	Process Description . . . . .	171
	Process Discussion . . . . .	176
	Cost Estimates . . . . .	176
	Capital Investment . . . . .	176
	Production Costs . . . . .	177
	Discussion of Costs . . . . .	178
	Conclusions . . . . .	179
<b>8</b>	<b>HYDROGEN BY DECOMPOSITION OF HYDROCARBONS . . . . .</b>	<b>183</b>
	Review of Processes . . . . .	183
	Cost Estimates (Updated) . . . . .	188
	Capital Investment . . . . .	188
	Production Costs . . . . .	188
	Discussion of Costs . . . . .	189
	Conclusions . . . . .	190
<b>9</b>	<b>HYDROGEN BY GASIFICATION OF COAL . . . . .</b>	<b>195</b>
	Review of Processes . . . . .	196
	Coal and Coke Gasification . . . . .	196
	Carbon Monoxide Shift Reaction . . . . .	211
	Process Description . . . . .	225
	Process Discussion . . . . .	234
	Cost Estimates . . . . .	238
	Capital Investment . . . . .	238
	Production Costs . . . . .	238
	Discussion of Costs . . . . .	239
	Conclusions . . . . .	242

## CONTENTS

10	HYDROGEN BY THE STEAM-IRON PROCESS . . . . .	253
	Review of Processes . . . . .	253
	Process Description . . . . .	257
	Process Discussion . . . . .	267
	Cost Estimates . . . . .	272
	Capital Investment . . . . .	272
	Production Costs . . . . .	273
	Discussion of Costs . . . . .	274
	Conclusions . . . . .	275
11	HYDROGEN BY OTHER PROCESSES . . . . .	287
	Hydrogen by Water Electrolysis . . . . .	287
	Technology . . . . .	287
	Costs . . . . .	293
	Hydrogen by Thermal Methods . . . . .	298
12	HYDROGEN PURIFICATION . . . . .	301
	Absorption Technology . . . . .	301
	Adsorption Technology . . . . .	313
	Cryogenic Purification . . . . .	314
	Palladium Adsorption and Diffusion . . . . .	325
	Conversion of Impurities . . . . .	335
	APPENDIX A DESIGN AND COST BASIS . . . . .	339
	APPENDIX B HEATS OF REACTION . . . . .	345
	APPENDIX C PHYSICAL PROPERTIES . . . . .	347
	APPENDIX D CONSTRUCTION MATERIALS, HANDLING, SAFETY, AND POLLUTION CONTROL . . . . .	351
	CITED REFERENCES . . . . .	357
	PATENT REFERENCES BY COMPANY . . . . .	393

## ILLUSTRATIONS

2.1	Hydrogen Net Production Cost as a Function of the Natural Gas Price to a Steam Reforming Operation Together with the Raw Material Prices Needed by Other Processes to Give the Same Hydrogen Cost . . . . .	9
3.1	Hydrogen Consumption in the United States by Various Processes and Chemicals . . . . .	16
3.2	A Two-Stage Liquefaction and para-Hydrogen Conversion Process . . . . .	37
3.3	Comparative Costs of Energy Delivered as Electrolytic Hydrogen, Natural Gas, or Electric Power . . . . .	39
4.1	Effect of Pressure on Gasifier Yield for 0.09 fps Steam Velocity at 800°C and 60 Minutes' Coal Residence Time . . .	50
4.2	Effect of Temperature on Gasifier Yield for 0.9 fps Steam Velocity at a Steam/Carbon Ratio of 3.29 lb/lb . . . . .	51
4.3	Effect of Temperature on Water Gas Shift Conversion for Several Catalysts . . . . .	54
5.1	Hydrogen by Catalytic Steam Reforming of Methane Hydrogen Production as a Function of Methane Feed Rate and Steam/Carbon Ratio . . . . .	89
5.2	Hydrogen by Catalytic Steam Reforming of Methane Product Distribution Profiles as Functions of Reformer Tube Length . . . . .	90
5.3	Hydrogen by Catalytic Steam Reforming of Methane Hydrogen Purity and Furnace Tube Life as Functions of Reformer Pressure and Temperature . . . . .	91
5.4	Hydrogen by Catalytic Steam Reforming of Natural Gas . . .	97
5.5	Hydrogen by Catalytic Steam Reforming of Naphtha . . . . .	103
5.6	Hydrogen by Catalytic Steam Reforming of Hydrocarbons Comparison of Estimated Battery Limits Investments for Natural Gas- and Naphtha-Based Plants . . . . .	119
5.7	Hydrogen by Catalytic Steam Reforming of Hydrocarbons Production Costs as Functions of Plant Capacity, Operating Rate, and Natural Gas or Naphtha Costs . . . . .	121
5.8	Hydrogen by Catalytic Steam Reforming of Hydrocarbons Competitive Natural Gas and Naphtha Prices . . . . .	123

## ILLUSTRATIONS

6.1	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil General Comparison of Shell and Texaco Processes . . . . .	127
6.2	Hydrogen by Noncatalytic Partial Oxidation of Hydrocarbons Alternative Downstream Processing Routes of Partial Oxidation Gases to Hydrogen . . . . .	136
6.3	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil . . . . .	143
6.4	Solubility of Gases in Methanol . . . . .	151
6.5	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil Capital Investment . . . . .	157
6.6	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil Production Cost as a Function of Plant Capacity, Operating Rate, and Residual Oil and Oxygen Costs . . . . .	161
6.7	Hydrogen by Noncatalytic Partial Oxidation of Hydrocarbons Comparative Raw Material Prices for Equal Hydrogen Production Costs . . . . .	163
7.1	Hydrogen by Catalytic Partial Oxidation of Hydrocarbons . .	173
7.2	Comparison of Fixed Capital Investments and Production Costs for Hydrogen by Steam Reforming and by Noncatalytic and Catalytic Partial Oxidation as Functions of Plant Capacity . . . . .	182
8.1	Hydrogen by the Universal Oil Products Hypro <sup>®</sup> Process . . .	184
8.2	Comparison of Capital Investments and Production Costs for Hydrogen from Methane by Catalytic Steam Reforming and by Catalytic Decomposition, as Functions of Plant Capacity . . . . .	193
9.1	Hydrogen by Gasification of Coal . . . . .	229
9.2	Hydrogen by Gasification of Coal Effect of Gasification Pressure on Theoretical Gas Composition . . . . .	236
9.3	Hydrogen by Gasification of Coal Effect of Gasification Temperature on Theoretical Gas Composition . . . . .	236
9.4	Hydrogen by Gasification of Coal Estimated Total Capital Requirement as a Function of Plant Capacity . . . . .	248

## ILLUSTRATIONS

9.5	Hydrogen by Gasification of Bituminous Coal Estimated Net Production Cost as a Function of Plant Capacity . . . . .	249
9.6	Hydrogen by Gasification of Coal Production Cost as a Function of Plant Capacity and Raw Material Costs . . . . .	250
9.7	Hydrogen by Gasification of Bituminous Coal Equivalent Raw Material Costs . . . . .	251
10.1	Equilibrium Data for the Steam-Iron Reaction . . . . .	254
10.2	A Steam-Iron Reactor . . . . .	256
10.3	Hydrogen by the Steam-Iron Process . . . . .	263
10.4	Hydrogen by the Steam-Iron Process Capital Investment as a Function of Plant Capacity . . . . .	279
10.5	Hydrogen by the Steam-Iron Process Production Cost as a Function of Plant Capacity and Bituminous Coal Cost . . . . .	284
10.6	Hydrogen by the Steam-Iron Process Equivalent Raw Material Costs . . . . .	286
11.1	Hydrogen by Water Electrolysis Unipolar Cell . . . . .	288
11.2	Hydrogen by Water Electrolysis Bipolar Cell . . . . .	290
11.3	Hydrogen by Water Electrolysis Cell Voltage and Current Density . . . . .	292
11.4	Equivalent Raw Material Costs for the Production of Hydrogen by Electrolysis, Steam Reforming, and Coal Gasification as Functions of Electricity Cost and By-Product Oxygen Value . . . . .	297
12.1	Cooling Cycle for Hydrocarbon Separation from Hydrogen . . . . .	318

## TABLES

2.1	Summary of Costs for Hydrogen Production Processes . . . . .	5
2.2	Technical Considerations in the Selection of Hydrogen Production Processes . . . . .	11
3.1	Worldwide Hydrogen Consumption in 1970 . . . . .	18
3.2	Hydrogen Plant Construction Since 1967 . . . . .	21
5.1	Hydrogen by Catalytic Steam Reforming of Hydrocarbons Summary of Catalyst Patents . . . . .	61
5.2	Hydrogen by Catalytic Steam Reforming of Hydrocarbons Summary of Process Patents . . . . .	75
5.3	Hydrogen by Catalytic Steam Reforming of Natural Gas Major Process Equipment and Utilities Summary . . . . .	95
5.4	Hydrogen by Catalytic Steam Reforming of Natural Gas Stream Flows . . . . .	99
5.5	Hydrogen by Catalytic Steam Reforming of Naphtha Major Process Equipment and Utilities Summary . . . . .	101
5.6	Hydrogen by Catalytic Steam Reforming of Naphtha Stream Flows . . . . .	105
5.7	Hydrogen by Catalytic Steam Reforming of Natural Gas Total Capital Investment . . . . .	113
5.8	Hydrogen by Catalytic Steam Reforming of Naphtha Total Capital Investment . . . . .	115
5.9	Hydrogen by Catalytic Steam Reforming of Natural Gas Production Costs . . . . .	117
5.10	Hydrogen by Catalytic Steam Reforming of Naphtha Production Costs . . . . .	118
6.1	Hydrogen by Noncatalytic Partial Oxidation of Hydrocarbons Summary of Process and Equipment Patents . . . . .	131
6.2	Hydrogen by Noncatalytic Partial Oxidation of Hydrocarbons Capacity and Selectivity of Acid Gas Solvents . . . . .	137
6.3	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil Major Process Equipment and Utilities Summary . . . . .	143

## TABLES

6.4	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil Stream Flows . . . . .	147
6.5	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil Total Capital Investment . . . . .	155
6.6	Hydrogen by Noncatalytic Partial Oxidation of Residual Oil Production Costs . . . . .	159
7.1	Hydrogen by Catalytic Partial Oxidation of Hydrocarbons Summary of Patents . . . . .	167
7.2	Hydrogen by Catalytic Partial Oxidation of Hydrocarbons Major Process Equipment and Utilities Summary . . . . .	173
7.3	Hydrogen by Catalytic Partial Oxidation of Hydrocarbons Stream Flows . . . . .	175
7.4	Hydrogen by Catalytic Partial Oxidation of Hydrocarbons Total Capital Investment . . . . .	180
7.5	Hydrogen by Catalytic Partial Oxidation of Hydrocarbons Production Costs . . . . .	181
8.1	Hydrogen by Decomposition of Hydrocarbons Summary of Patents . . . . .	186
8.2	Hydrogen by Catalytic Decomposition of Natural Gas Total Capital Investment . . . . .	191
8.3	Hydrogen by Catalytic Decomposition of Natural Gas Production Costs . . . . .	192
9.1	Hydrogen by Gasification of Coal or Coke Characteristics and Performance of Various Gasifiers . . .	199
9.2	Hydrogen by Gasification of Coal Recent Developments in U.S. Industry Coal Gasification Plans . . . . .	205
9.3	Hydrogen from Coal or Coke Summary of Patents . . . . .	212

## TABLES

9.4	Carbon Monoxide Shift Reaction Summary of Patents . . . . .	215
9.5	Hydrogen by Gasification of Coal Major Process Equipment and Utilities Summary . . . . .	228
9.6	Hydrogen by Gasification of Coal Stream Flows . . . . .	231
9.7	Hydrogen by Gasification of Coal Summary of Waste Products . . . . .	233
9.8	Hydrogen by Gasification of Coal Comparative Data for Commercial, Low Pressure Coal Gasifiers Using Steam and Oxygen . . . . .	237
9.9	Hydrogen by Gasification of Coal Total Capital Investment . . . . .	243
9.10	Hydrogen by Gasification of Coal Production Costs . . . . .	245
9.11	Hydrogen by Gasification of Coal Comparative Capital and Production Cost Estimates for Various Gasifiers . . . . .	247
10.1	Hydrogen by the Steam-Iron Process Summary of Patents . . . . .	259
10.2	Hydrogen by the Steam-Iron Process Major Process Equipment and Utilities Summary . . . . .	262
10.3	Hydrogen by the Steam-Iron Process Stream Flows . . . . .	265
10.4	Hydrogen by the Steam-Iron Process Summary of Waste Products . . . . .	271
10.5	Hydrogen by the Steam-Iron Process Total Capital Investment . . . . .	277
10.6	Hydrogen by the Steam-Iron Process Estimated Capital Requirements (from the Literature) . . . . .	280
10.7	Hydrogen by the Steam-Iron Process Production Costs . . . . .	281
10.8	Hydrogen by the Steam-Iron Process Estimated Production Costs (from the Literature) . . . . .	283

TABLES

10.9	Hydrogen by the Steam-Iron Process Comparative Investment and Production Costs for Hydrogen by Various Other Processes . . . . .	285
11.1	Hydrogen by Water Electrolysis Approximate Capital and Production Costs . . . . .	296
11.2	Dissociation of Water at Different Temperatures and Pressures . . . . .	298
12.1	Hydrogen Purification Methods . . . . .	303
12.2	Hydrogen Purification by Absorption Summary of Patents . . . . .	309
12.3	Hydrogen Purification by Adsorption Summary of Patents . . . . .	315
12.4	Hydrogen Purification by Cryogenic Methods Summary of Patents . . . . .	321
12.5	Hydrogen Purification by Palladium Diffusion or Adsorption Summary of Patents . . . . .	329
12.6	Processes for the Conversion of Impurities in Hydrogen Summary of Patents . . . . .	337
C.1	Summary of Recent Data Sources for Physical Properties of Hydrogen . . . . .	349
