

Report No. 36A

LOW DENSITY POLYETHYLENE

Supplement A

by **ROBERT L. MAGOVERN**

March 1977

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	3
	Ethylene Homopolymers	3
	Economics	4
	Technical Aspects	5
	Ethylene Copolymers	6
3	COMPARISON OF PROCESSES	9
4	INDUSTRY STATUS	19
	World Capacity	19
	Production	19
	Prices	29
	Consumption According to Main Uses	29
5	CHEMISTRY	35
	Reaction Mechanism	35
	Pressure-Enthalpy Data for Ethylene	39
	Heat of Polymerization	39
6	REVIEW OF PROCESSES	41
	Autoclave Reactors	43
	Tubular Reactors	45
	Control of Product Characteristics	45
	Initiators and Catalysts	46
	Copolymers	46
	Reactor Controls and Overpressure Relief	47
	Possible Energy Recovery	49
	Licensors and Patent Holders	49
	ANIC SpA	54
	ATO Chimie	55
	BASF	57
	CdF Chimie (Ethylene Plastique Process)	58
	Dart Industries	60
	Dow Chemical	61
	Du Pont	62
	Eastman Kodak	63
	Exxon	64
	Gulf Oil Chemicals	66
	Imperial Chemical Industries	67

CONTENTS

6	REVIEW OF PROCESSES (Continued)	
	Imhausen International	68
	Mitsubishi Petrochemical Co.	69
	National Distillers and Chemical	71
	Societa Italiana Resine (Euteco SpA)	72
	Stamicarbon	74
	Sumitomo Chemical	75
	Union Carbide	76
	VEB Leuna Werke Ulbricht	77
7	LOW DENSITY POLYETHYLENE FROM A TUBULAR REACTOR	79
	Process Description	79
	Process Discussion	86
	Reactor	86
	Wax Removal	88
	Product Finishing	89
	Cost Estimates	90
	Capital Costs	90
	Production Costs	91
	Alternative Finishing Arrangements	97
8	LOW DENSITY POLYETHYLENE FROM AN AUTOCLAVE REACTOR	99
	Process Using Compartmented Autoclave	99
	Process Description	99
	Process Discussion	105
	Reactor	105
	Reaction Temperature and Pressure	105
	Initiators	109
	Ethylene Conversion	111
	Residence Time	112
	Product Finishing	113
	Cost Estimates	113
	Capital Costs	113
	Production Costs	114
	Process Using Backmixed Autoclave	119
	Process Description and Discussion	119
	Cost Estimates	121
	Capital Costs	121
	Production Costs	121

CONTENTS

9	COPOLYMERS	127
	Ethylene-Vinyl Acetate (EVA) Copolymers	128
	General Aspects	128
	Economics	129
	Ethylene-Ethyl Acrylate (EEA) Copolymers	133
	General Aspects	133
	Economics	133
	Ethylene-Acrylic Acid (EAA) Copolymers	135
	General Aspects	135
	Properties	136
	Uses	137
	Avoiding Corrosion Problems	137
	Economics	138
	Ionomers	138
	APPENDIX A DESIGN AND COST BASIS	143
	APPENDIX B EFFLUENT STREAMS AND WASTE TREATMENT	147
	APPENDIX C SAFETY IN DESIGN AND OPERATION OF HIGH PRESSURE POLYETHYLENE PLANTS	149
	CITED REFERENCES	153
	SUPPLEMENTARY REFERENCES	161
	PATENT REFERENCES BY COMPANY	167

ILLUSTRATIONS

3.1	Low Density Polyethylene Product Value as a Function of Design Ethylene Conversion per Pass	14
3.2	Low Density Polyethylene Production Cost as a Function of Operating Ethylene Conversion per Pass	16
5.1	Low Density Polyethylene Molecular Shapes Showing Long Chain Branching of Tubular and Autoclave Polymers	38
6.1	Low Density Polyethylene Tubular Reactor of Exxon	65
7.1	Low Density Polyethylene from a Tubular Reactor Flow Sheet	173
7.2	Low Density Polyethylene from a Tubular Reactor Effect of Operating Level and Plant Capacity on Production Cost	96
8.1	Low Density Polyethylene from an Autoclave Reactor Flow Sheet	179
8.2	Low Density Polyethylene from an Autoclave Reactor Reactor Feed and Control Scheme for Compartmented Reactor	106
8.3	Low Density Polyethylene from an Autoclave Reactor Reaction Temperature Profile in Compartmented Reactor	107
8.4	Low Density Polyethylene from an Autoclave Reactor Cross-Section of Compartmented Reactor	108
8.5	Low Density Polyethylene from an Autoclave Reactor (Compartmented) Effect of Operating Level and Plant Capacity on Production Cost	118
9.1	Ethylene-Vinyl Acetate Copolymer Effect of Composition on Production Cost	132

TABLES

3.1	Low Density Polyethylene Comparison of Process Design Conditions	10
3.2	Low Density Polyethylene Comparison of Process Economics	11
3.3	Low Density Polyethylene Effect of Changing Design Base Ethylene Conversion on Costs	13
3.4	Low Density Polyethylene Effect of Operating at Various Ethylene Conversions on Output and on Production Cost	15
3.5	Ethylene Copolymer Production Economics Based on Using a Compartmented Autoclave LDPE Production Plant	18
4.1	Low Density Polyethylene Plant Capacities	20
4.2	Low Density Polyethylene Production in the United States	29
4.3	Low Density Polyethylene Production, Consumption, and Capacity in North America, Western Europe, and Japan	30
4.4	Low Density Polyethylene List Prices of Resins in the United States	31
4.5	Low Density Polyethylene Consumption Pattern in the United States	32
4.6	Low Density Polyethylene Consumption Pattern in Western Europe	33
4.7	Low Density Polyethylene Consumption Pattern in the European Economic Community . . .	33
4.8	Low Density Polyethylene Consumption Pattern in Japan	34
6.1	Low Density Polyethylene Licensing Information	50
7.1	Low Density Polyethylene from a Tubular Reactor Major Equipment and Utilities Summary	83
7.2	Low Density Polyethylene from a Tubular Reactor Stream Flows	85

TABLES

7.3	Low Density Polyethylene from a Tubular Reactor Design Bases and Assumptions	88
7.4	Low Density Polyethylene from a Tubular Reactor Total Capital Investment	93
7.5	Low Density Polyethylene from a Tubular Reactor Production Costs	94
7.6	Low Density Polyethylene from a Tubular Reactor Costs of Improving Product Quality by Homogenizing	97
8.1	Low Density Polyethylene from an Autoclave Reactor (Compartmented) Major Equipment and Utilities Summary	102
8.2	Low Density Polyethylene from an Autoclave Reactor (Compartmented) Stream Flows	104
8.3	Low Density Polyethylene from an Autoclave Reactor (Compartmented) Design Bases and Assumptions	113
8.4	Low Density Polyethylene from an Autoclave Reactor (Compartmented) Total Capital Investment	115
8.5	Low Density Polyethylene from an Autoclave Reactor (Compartmented) Production Costs	116
8.6	Low Density Polyethylene from an Autoclave Reactor (Backmixed) Stream Flows	120
8.7	Low Density Polyethylene from an Autoclave Reactor (Backmixed) Total Capital Investment	122
8.8	Low Density Polyethylene from an Autoclave Reactor (Backmixed) Production Costs	124
9.1	Ethylene-Vinyl Acetate Copolymer (10% VA, Compartmented Autoclave Reactor) Production Costs	131

TABLES

9.2	Ethylene-Ethyl Acrylate Copolymer (10% EA, Compartmented Autoclave Reactor) Production Costs	134
9.3	Ethylene-Acrylic Acid Copolymer (10% AA, Compartmented Autoclave Reactor) Production Costs	139
B.1	Composite Low Density Polyethylene Net Material Balance . .	147
