

Report No. 51

REINFORCED PLASTICS

by WING SIEN FONG

August 1969

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	3
3	INDUSTRY STATUS	15
	Introduction	15
	United States	16
	Aircraft	25
	Boats	37
	Construction	38
	Electrical and Electronics	40
	Housewares and Consumer Products	41
	Pipes	41
	Recreation	42
	Rockets, Missiles, and Weaponry	42
	Transportation	47
	Vessels	47
	Process Equipment (Excluding Vessels and Piping)	49
	Underwater Vehicles	49
	Australia	50
	Belgium	51
	Canada	51
	Denmark	52
	France	52
	Finland	52
	Germany (East)	52
	Germany (West)	53
	Israel	53
	Italy	53
	Japan	54
	Latin America	55
	The Netherlands	55
	Norway	56
	South Africa	56
	Sweden	56
	United Kingdom	57
	USSR	57
	Licensing	57
	Product Failure	58

CONTENTS

4	PRINCIPLES OF FIBROUS REINFORCEMENT OF PLASTICS	61
	Introduction	61
	Strengthening Mechanism	61
	Tensile Load	61
	Compressive Load	69
	Laminated Sheets	70
	State of Stress	70
	Stress Distribution	70
	Fiber Spacing and Geometry	72
	Cure-Shrinkage of Resin	72
	Voids	73
	Interface	75
	Theories	75
	Wettability and Adhesion	76
	Coupling Agents	79
	Fracture Behavior	84
	Fracture Initiation and Propagation	84
	Mode of Failure	88
	Corrosion	89
5	GENERAL PROPERTIES AND FACTORS AFFECTING THEM	91
	Resin	99
	Reinforcement	154
	Temperature	155
	Thermal Properties	155
	Weatherability, Water Absorption, and Chemical Resistance	156
	Creep	157
	Fatigue	157
	Impact	157
	Electric Properties	158
	Radiation	158
	Density and Appearance	158
	Safety Factor	159
6	RESINS	161
	ABS (Acrylonitrile-Butadiene-Styrene)	161
	Acetal Resins	167
	Acrylic Resins	167
	Alkyd Resins	168
	Allyl Resins	169
	Amino Resins	169
	Chlorinated Polyether	170

CONTENTS

6 (Continued)

Epoxy Resins	171
EVA (Ethylene-Vinyl Acetate)	173
Fluoroplastics	173
Furane Resins	175
High-Temperature Resins	175
Polyimides	176
Polybenzimidazole	177
Polybenzothiazole	177
Polyquinoxalines	177
Borane-Based Resins	177
Ionomer Resins	178
Parylene Polymers	178
Phenolics	179
Phenoxy Resins	180
Polyallomer Copolymers	181
Polyamides (Nylons)	181
Polycarbonate Resins	182
Polyethylenes	183
Polyphenylene Oxide Resins	184
Polypropylenes	185
Polystyrenes	186
Polysulfones	187
Polyurethane Resins	188
Polyvinyl Chloride Resins	188
Silicones	189
Unsaturated Polyester Resins	190
7 REINFORCEMENTS	195
Glass	195
Asbestos	205
Boron Fibers	206
Carbon and Graphite Fibers	208
Whiskers	210
Quartz and Silica Fibers	212
Ceramic Fibers	213
Metal Fibers	215
Natural Organic Fibers	216
Synthetic Organic Fibers	217

CONTENTS

8	COMPRESSION MOLDING	219
	Advantages and Limitations	219
	Types of Compression Molding	220
	Presses	223
	Molds	224
	General Molding Procedure and Conditions	227
	Quality Control	229
	Safety	229
	Cleaning of Equipment	229
	Process Economics	229
	Mat Molding	235
	Review of Processes	235
	Process Description	235
	Process Discussion	239
	Cost Estimates	241
	Premix Molding	251
	Review of Processes	251
	Process Description	252
	Process Discussion	257
	Cost Estimates	260
	Prepreg Molding	270
	Review of Processes	270
	Process Description	271
	Process Discussion	275
	Cost Estimates	276
	Preform Molding	284
	Review of Processes	284
	Process Description	286
	Process Discussion	291
	Cost Estimates	293
9	THE LAY-UP METHODS	303
	Introduction	303
	Review of Processes	304
	Resins	304
	Reinforcement	305
	Prepregs	305
	Gel Coat	305
	Colorants	306
	Releasing Agents	306
	Hand Lay-Up	310
	Spray-Up	311
	Pressure Lay-Up	314

CONTENTS

9 (Continued)

Process Descriptions 315
 Making of the Mold 315
 Removal of the Finished Part 323
 Quality Control 323
 Finishing of Parts 324
 Safety Precautions 324
 Hand Lay-Up 324
 Spray-Up 326
 Vacuum-Bag Molding 328
 Pressure-Bag Molding 330
 Autoclave Molding 330
Process Discussion 331
 Hand Lay-Up 331
 Spray-Up 332
 Pressure Lay-Up 333
Cost Estimates 336

10 ROTATIONAL MOLDING AND CENTRIFUGAL CASTING 351

Introduction 351
Limitations and Advantages 351
Review of Processes 352
 Rotational Molding 352
 Centrifugal Casting 355
Process Description 355
 Rotational Molding 355
 Centrifugal Casting 356
Process Discussion 363
 Rotational Molding 363
 Centrifugal Casting 364
Cost Estimates 365
 Rotational Molding 365
 Centrifugal Casting 366

11 FILAMENT WINDING 381

Introduction 381
Review of Processes 381
 Process 381
 Resins 384
 Reinforcement 385
 Equipment 385
 Winding Pattern 387

CONTENTS

11 (Continued)	Tensioning	387
	Mandrel	388
	Type of Control	389
	Process Description	389
	Process Discussion	393

	Introduction	431
	Review of Processes	432
	Continuous Lamination of Flat and Corrugated Sheeting	432
	Prepregs	433
	Sandwich Structures	447
	Pultrusion	448
	Process Description	449
	Continuous Lamination of Flat and Corrugated Fiber Glass Reinforced Sheeting	449
	Prepregs	450
	Sandwich Structures	451
	Pultrusion	451
	Process Discussion	455
	Cost Estimates	458
	Continuous Lamination of Flat and Corrugated Fiber Glass Reinforced Sheeting	458
	Pultrusion	460
	Sandwich Structures	461
	Prepregs	461
APPENDIX A	COST BASIS	473
REFERENCES	477

ILLUSTRATIONS

3.1	Actual and Projected Consumption of Reinforced Plastics in United States	18
3.2	Production of Reinforced Plastic Pipes in United States	44
8.1	Matched Metal Die Mat Molding	237
8.2	Matched Metal Die Mat Molding Effect of Raw Material on Production Cost	247
8.3	Matched Metal Die Mat Molding Effect of Utilities, Fixed Capital-Related and Labor-Related Costs on Production Cost	248
8.4	Matched Metal Die Mat Molding Effect of Molding Cycle Time on Production Cost	249
8.5	Matched Metal Die Mat Molding Effect of Operating Rate on Product Cost	250
8.6	Matched Metal Die Premix Molding	255
8.7	Matched Metal Die Premix Molding Effect of Raw Material on Production Cost	266
8.8	Matched Metal Die Premix Molding Effect of Utilities, Fixed Capital-Related and Labor-Related Costs on Production	267
8.9	Matched Metal Die Premix Molding Effect of Molding Cycle Time on Production Cost	268
8.10	Matched Metal Die Premix Molding Effect of Operating Rate and Plant Capacity on Production Cost	269
8.11	Matched Metal Die Prepreg Molding	273
8.12	Matched Metal Die Prepreg Molding Effect of Raw Material, Utilities, Fixed Capital-Related and Labor-Related Costs on Production Cost	281
8.13	Matched Metal Die Prepreg Molding Effect of Molding Cycle Time on Production Cost	282
8.14	Matched Metal Die Prepreg Molding Effect of Operating Rate and Plant Capacity on Production Cost	283
8.15	Matched Metal Die Preform Molding	289

ILLUSTRATIONS

8.16	Matched Metal Die Preform Molding Effect of Raw Material Cost on Production Cost	299
8.17	Matched Metal Die Preform Molding Effect of Utilities, Fixed Capital-Related and Labor- Related Costs on Production Cost	300
8.18	Matched Metal Die Preform Molding Effect of Molding Cycle Time on Production Cost	301
8.19	Matched Metal Die Preform Molding Effect of Operating Rate and Plant Capacity on Production Cost	302
9.1	Reinforced Plastics by Hand Lay-Up, Spray-Up, Vacuum Bag, Pressure Bag, and Autoclave Moldings	317
9.2	Lay-Up Effect of Manual Output on Production Cost	349
10.1	Rotational Molding of Glass-Reinforced Thermoplastics . .	359
10.2	Centrifugal Casting of Reinforced Plastic Pipes or Other Cylindrical Products	361
10.3	Rotational Molding of Glass Fiber Reinforced Thermoplastics Effect of Cycle Time on Production Cost	371
10.4	Rotational Molding of Glass Fiber Reinforced Thermoplastics Effect of Operating Rate on Production Cost	372
10.5	Centrifugal Casting of Reinforced Plastic Pipes Effect of Cycle Time on Production Cost	379
10.6	Centrifugal Casting of Reinforced Plastic Pipes Effect of Operating Rate on Production Cost	380
11.1	Filament Winding	391
11.2	Filament Winding Effect of Cycle Time on Production Cost	399
11.3	Filament Winding Effect of Operating Rate on Production Cost	400
12.1	Injection Molding of Glass-Fiber Reinforced Thermoplastics	411
12.2	Injection Molding of Glass-Fiber Reinforced Thermoplastics (Polystyrene) Effect of Operating Rate and Production Volume on the Production Cost	429

ILLUSTRATIONS

13.1	Continuous Lamination and Pultrusion Flowsheet	453
13.2	Continuous Lamination of Sheeting Effect of Raw Material, Labor, and Fixed Capital Related Costs on Production Cost	464
13.3	Continuous Lamination of Sheeting Effect of Production Speed on Production Cost	465
13.4	Continuous Lamination of Sheeting Effect of Operating Rate on Production Cost	466
13.5	Pultrusion Effect of Raw Material, Labor, and Fixed Capital Related Costs on Production Cost	469
13.6	Pultrusion Effect of Production Rate on Production Cost	470
13.7	Pultrusion Effect of Operating Rate on Production Cost	471

TABLES

2.1	Summary of the Process Economics for Various Reinforced Plastics Fabrication Processes Under Certain Assumptions	7
3.1	Pattern of Consumption of Reinforced Plastics in the United States	17
3.2	Suppliers of Reinforced Thermosetting Molding Compounds and Premixes	21
3.3	Suppliers of Preimpregnated Plastics U.S. Companies	23
3.4	Suppliers of Reinforced Thermoplastics U.S. Companies	27
3.5	Glass-Reinforced Thermoplastics Price Ranges	29
3.6	Trade Names of Reinforced Plastics and Related Products .	30
3.7	Trade Names of Reinforcements	35
3.8	Trade Names of Some of the Fabrication Processes and Equipment	36
3.9	Some Standard Stock Items of Glass-Fiber Reinforced Plastic Structural Shapes	39
3.10	Major Producers of Machine-Made Reinforced Plastic Pipes .	43
3.11	Typical Properties and Price Range of Some Standard Reinforced Plastic Pipes	45
3.12	Some Reported Licensing Arrangements for Reinforced Plastics	59
5.1	Typical Properties of Various Reinforced Plastics	93
5.2	Effects of Various Factors on the Mechanical Properties of Reinforced Thermosets	101
5.3	Effects of Glass Type, Form, Geometry, and Sizing on the Mechanical Properties of Reinforced Plastics	115
5.4	Effects of Environmental Influences, Composition, Glass Type, Fiber Orientation, and Surfacing Mat on the Mechanical Properties of Reinforced Plastics	121
5.5	Effects of Molding Methods, Molding Conditions and Resin Properties on the Mechanical and Electrical Properties of Reinforced Plastics	129

TABLES

5.6	Effects of Reinforcements Other Than Glass Fibers on Mechanical and Thermal Properties of Reinforced Plastics .	135
5.7	Effects of Void Content, Temperature, and Pressure for High Temperature Polyimide Systems on the Mechanical and Electrical Properties of Reinforced Plastics	137
5.8	Effects of Various Factors on the Properties of Reinforced Thermoplastics	139
6.1	Properties, Prices, and Availability of Reinforced Molding Compounds of Some Resins	163
6.2	Commercial Classification of Polyester Resins	193
7.1	Typical Chemical Compositions of Various Types of Glass .	197
7.2	Typical Properties of Various Types of Glass Fibers . . .	199
7.3	Properties of Chrysotile and Crocidolite	207
7.4	Typical Physical Properties of Some Whiskers	211
7.5	Typical Physical Properties of Some Inorganic Fibers . . .	214
7.6	Typical Physical Properties of Some Natural Organic Fibers	217
7.7	Typical Physical Properties of Some Synthetic Organic Fibers	218
8.1	Compression Molding Approximate Usable Area and Prices of Commercial Compression Presses for Reinforced Plastics Molding	232
8.2	Compression Molding Summary of Advantages, Limitations, Molding Characteristics and Typical Products of Matched Metal Die Mat, Premix, Prepreg, and Preform Molding	233
8.3	Matched Metal Die Mat Molding Major Process Equipment and Utilities Summary	237
8.4	Matched Metal Die Mat Molding Total Capital Investment	243
8.5	Matched Metal Die Mat Molding Production Costs	245
8.6	Matched Metal Die Premix Molding Major Process Equipment and Utilities Summary	255

TABLES

8.7	Matched Metal Die Premix Molding Total Capital Investment	262
8.8	Matched Metal Die Premix Molding Production Costs	263
8.9	Matched Metal Die Premix Molding Approximate Costs for Rectangular Trough Mixers	265
8.10	Matched Metal Die Premix Molding Extruders for Premix Molding Compound	265
8.11	Matched Metal Die Prepreg Molding Major Process Equipment and Utilities Summary	273
8.12	Matched Metal Die Prepreg Molding Total Capital Investment	278
8.13	Matched Metal Die Prepreg Molding Production Costs	279
8.14	Matched Metal Die Preform Molding Major Process Equipment and Utilities Summary	289
8.15	Matched Metal Die Preform Molding Total Capital Investment	295
8.16	Matched Metal Die Preform Molding Production Costs	297
9.1	The Lay-Up Methods Advantages and Disadvantages in Hand Lay-Up, Spray-Up, Vacuum Bag, Pressure Bag, and Autoclave Moldings of Reinforced Plastics	307
9.2	Colorants for Unsaturated Polyester and Epoxy Resins . . .	309
9.3	Reinforced Plastics by Hand Lay-Up, Spray-Up, Vacuum Bag, Pressure Bag, and Autoclave Moldings Major Process Equipment List	317
9.4	Lay-Up Methods Total Capital Investment	341
9.5	Hand Lay-Up of Reinforced Plastics Production Costs	343
9.6	Spray-Up of Reinforced Plastics Production Costs	344

TABLES

9.7	Vacuum Bag, Pressure Bag, Autoclave Molding of Reinforced Plastics Via Hand Lay-Up Production Costs	345
9.8	Vacuum Bag, Pressure Bag, Autoclave Molding of Reinforced Plastics Via Spray-Up Production Costs	347
10.1	Rotational Molding of Glass-Reinforced Thermoplastics Major Process Equipment and Utilities Summary	359
10.2	Centrifugal Casting of Reinforced Plastic Pipes or Other Cylindrical Products Major Process Equipment and Utilities Summary	361
10.3	Rotational Molding of Glass-Reinforced Thermoplastics Total Capital Investment	368
10.4	Rotational Molding of Glass-Fiber Reinforced Thermoplastics Production Cost	369
10.5	Rotational Molding of Glass-Reinforced Thermoplastics Approximate Prices for Various Commercial Standard Rotational Molding Machines	373
10.6	Centrifugal Casting of Reinforced Plastic Pipes or Other Cylindrical Products	374
10.7	Centrifugal Casting of Reinforced Plastic Pipes or Other Cylindrical Products Total Capital Investment	375
10.8	Centrifugal Casting of Reinforced Plastic Pipes or Other Cylindrical Products Production Cost	377
11.1	Filament Winding Major Process Equipment and Utility Summary	391
11.2	Filament Winding Total Capital Investment	397
11.3	Filament Winding Production Cost	398
11.4	Filament Winding Approximate Prices for Various Filament Winding Machines .	401
12.1	Injection Molding of Glass-Fiber Reinforced Thermoplastics Major Process Equipment and Utilities Summary	411

TABLES

12.2	Injection Molding of Glass-Fiber Reinforced Thermoplastics Conditions for Molding	413
12.3	Injection Molding of Glass-Fiber Reinforced Thermoplastics Total Capital Investment	421
12.4	Injection Molding of Glass-Fiber Reinforced Thermoplastics (Polystyrene) Production Cost for the Commercial Reinforced Pellet Process	423
12.5	Injection Molding of 30% Glass-Fiber Reinforced Thermo- plastics (Polystyrene) Production Costs for the Superconcentrate Process	425
12.6	Injection Molding of 30% Glass-Fiber Reinforced Thermo- plastics (Polystyrene) Production Cost for the Direct-Injection Process	427
12.7	Injection Molding	430
13.1	Continuous Lamination and Pultrusion Preparation Methods for Reinforced Plastic Sheet	435
13.2	Continuous Lamination and Pultrusion Compositions and Preparation Methods for Prepregs	441
13.3	Continuous Lamination of Flat and Corrugated Fiberglass Reinforced Sheet Major Process Equipment and Utility Summary	452
13.4	Pultrusion Major Process Equipment and Utility Summary	453
13.5	Continuous Lamination of Flat and Corrugated Fiberglass Reinforced Sheet Total Capital Investment	462
13.6	Continuous Lamination of Flat and Corrugated Fiberglass Reinforced Sheet Production Costs	463
13.7	Pultrusion Total Capital Investment	467
13.8	Pultrusion Production Costs	468
