

Report No. 60

PROTEINS FROM HYDROCARBONS

by WING SIEN FONG

February 1970

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	3
3	INDUSTRY STATUS	9
	World Protein Gap	9
	Proteins from Petroleum Hydrocarbons	13
	Current Activities	13
	Price	19
	Advantages and Disadvantages	21
	Nutritional Values	23
4	CHEMISTRY	29
	Introduction	29
	Substrate Specificity	30
	Microorganisms	31
	Oxygen Requirement	32
	Mechanism	34
	n-Paraffins	34
	Alkenes and Cycloalkanes	37
	Aromatics	38
	Co-oxidation	40
	Kinetics	40
	Introduction	40
	Growth Curves	41
	Rate Equations	43
	Chemical Equations	45
	Growth Limiting Factors	45
	Cell Yields	46
	Reaction By-Products	46
5	PROTEINS FROM GAS OIL	49
	Review of Processes	49
	Process Description	62
	Process Discussion	73
	Cost Estimates	77
6	PROTEINS FROM n-PARAFFINS	89
	Review of Processes	89
	Process Description	94

CONTENTS

6	(continued)	
	Process Discussion	101
	Cost Estimates	101
7	PROTEINS FROM NATURAL GAS	111
	Review of Processes	111
	Process Description	113
	Process Discussion	118
	Cost Estimates	120
8	ADDITIONAL NONCONVENTIONAL SOURCES FOR PROTEIN	131
	Introduction	131
	Yeast Grown on Sulfite Waste Liquor	132
	Fish Protein Concentrates	132
	Oilseed Proteins	139
	Proteins from Cellulosic Wastes	139
	Algal Cultivations	143
	Proteins from Coal-Derived Materials	144
	Proteins from Starches	144
	APPENDIX	147
	CITED REFERENCES	153
	PATENT REFERENCES BY COMPANY	173

ILLUSTRATIONS

3.1	World Population	10
3.2	Demand Projection of Proteins from Petroleum for Japan . . .	20
4.1	Growth Curves for Microbial Cell Production	42
5.1	Proteins from Gas Oil	67
5.2	Effects of Gas Oil Cost, Lipid and Dewaxed Gas Oil By-Product Credits, and Labor, Utilities, and Capital- Related Costs on Production Cost	85
5.3	Effects of Cell Yield and Dilution Rate on Production Cost	87
5.4	Effects of Plant Capacity and Stream Factor on Total Production Cost	88
6.1	Proteins from n-Paraffins	97
6.2	Effects of n-Paraffin Cost, and Labor, Utilities, and Capital-Related Costs on Production Cost	105
6.3	Effects of Cell Yield and Dilution Rate on Production Cost	106
6.4	Effects of Plant Capacity and Stream Factor on Production Cost	107
7.1	Proteins from Natural Gas	115
7.2	Effects of Natural Gas Cost, Exhaust Gas Credit, and Labor, Utilities, and Capital-Related Costs on Production Cost	124
7.3	Effects of Cell Yield and Dilution Rate on Production Cost	125
7.4	Effect of Cell Density on Production Cost	127
7.5	Effects of Plant Capacity and Stream Factor on Production Cost	128
8.1	Yeast Production from Sulfite Waste Liquor	133
8.2	Production of Fish Protein Concentrate	137
8.3	Generalized Processes for the Production of Various Soy Protein Products	141

TABLES

2.1	Capital Investment and Production Cost for the Production of Proteins from Gas Oil, Purified n-Paraffins, and Natural Gas	5
3.1	Production of Protein from Petroleum Hydrocarbons Summary of Current Activities	15
3.2	Summary of Protein Content and Amino Acid Distribution for Microorganism Growth	25
4.1	Commonly Cited Microorganisms Capable of Growing on Petroleum Hydrocarbons	33
4.2	Some of the Reported Cell Yield Data on the Production of Proteins from Petroleum Hydrocarbons	47
5.1	Proteins from Gas Oil (and Other Petroleum Fractions) Patent Summary	51
5.2	Proteins from Gas Oil Major Process Equipment and Utilities Summary	67
5.3	Proteins from Gas Oil Stream Flows	71
5.4	Proteins from Gas Oil Total Capital Investment	79
5.5	Proteins from Gas Oil Production Costs	81
5.6	Approximate Costs for a Single-Fermenter Production Line Plant	84
6.1	Proteins from n-Paraffins Patent Summary	91
6.2	Proteins from n-Paraffins Major Process Equipment and Utilities Summary	96
6.3	Proteins from n-Paraffins Stream Flows	99
6.4	Proteins from n-Paraffins Total Capital Investment	103
6.5	Proteins from n-Paraffins Production Costs	104

TABLES

6.6	Approximate Costs for a Single-Fermenter Production Line Plant	109
7.1	Proteins from Natural Gas Major Process Equipment and Utilities Summary	115
7.2	Proteins from Natural Gas Stream Flows	117
7.3	Proteins from Natural Gas Total Capital Investment	122
7.4	Proteins from Natural Gas Production Costs	123
7.5	Approximate Costs for a Single-Fermenter Production Line Plant	129
8.1	Recent Activities in the Production of Fish Protein Concentrates by Chemical Solvent Extraction Processes . . .	135
