## CONTENTS

1	INTRODUCTION . . . . .	1
2	SUMMARY . . . . .	3
3	INDUSTRY STATUS . . . . .	13
	Production and Production Capacity . . . . .	13
	The Problem of Chlorine-Alkali Balance . . . . .	26
4	COMPARISON OF PROCESSES . . . . .	29
	Comparison of Diaphragm Cell Process and Mercury Cell Process for Salt Electrolysis . . . . .	29
	Comparison of Three Processes Coproducing Chlorine and Soda Ash . . . . .	35
	Comparison of Processes for Production of Caustic Soda and Soda Ash . . . . .	38
	Comparison of Processes for Converting Hydrogen Chloride to Chlorine . . . . .	39
5	CHLORINE FROM SALT ELECTROLYSIS IN DIAPHRAGM CELLS . . . . .	43
	Review of Processes . . . . .	43
	Commercial Diaphragm Cells . . . . .	60
	Chlorine from Salt Electrolysis in Diaphragm Cells . . . . .	65
	Process Description . . . . .	65
	Process Discussion . . . . .	78
	Cost Estimate . . . . .	79
	Metal Anodes Versus Graphite Anodes . . . . .	86
	Salt Electrolysis in Diaphragm Cells for Production of Caustic Soda with Low Salt Content . . . . .	86
6	CHLORINE FROM SALT ELECTROLYSIS IN MERCURY CELLS . . . . .	91
	Review of Processes . . . . .	91
	Mercury Cells . . . . .	91
	The Mercury Pollution Problem . . . . .	99
	Characteristics of Modern Mercury Cells . . . . .	112
	Evaluation of a Process for Manufacturing Chlorine by Salt Electrolysis Using Mercury Cells . . . . .	114
	Process Description . . . . .	114
	Process Discussion . . . . .	130
	Cost Estimate . . . . .	131
	Metal Anodes Versus Graphite Anodes . . . . .	138

## CONTENTS

7	CHLORINE FROM HYDROGEN CHLORIDE . . . . .	141
	Preparation of Feed . . . . .	141
	Review of Processes for Converting HCl to Chlorine . . . . .	141
	Chlorine from Hydrogen Chloride by Oxidation with Nitrogen Oxides as Catalyst . . . . .	151
	Process Description . . . . .	151
	Process Discussion . . . . .	159
	Cost Estimate . . . . .	159
	Chlorine from Electrolysis of Hydrochloric Acid . . . . .	166
	Chlorine from Oxidation of Hydrogen Chloride Using a Heterogeneous Catalyst . . . . .	166
8	CHLORINE AS A COPRODUCT OF SODIUM CARBONATE . . . . .	175
	Review of Processes . . . . .	175
	Modified Solvay Process . . . . .	175
	Conventional Solvay Process . . . . .	177
	Combined Electrolysis/Solvay Process . . . . .	178
	Evaluation of Modified Solvay Process (Dual Solvay Process . . . . .	181
	Manufacture of Chlorine from Ammonium Chloride . . . . .	188
	Integration of Modified Solvay Process and Chlorine Production from Ammonium Chloride . . . . .	198
	Conversion of Conventional Solvay Process to Modified Solvay Process . . . . .	198
	Chlorine from Electrolysis with Coproduction of Sodium Carbonate by Carbonation . . . . .	200
	Chlorine from Salt Electrolysis Integrated with Solvay Process . . . . .	203
APPENDIX A	DESIGN AND COST BASIS . . . . .	211
APPENDIX B	POWER COST FOR ELECTROCHEMICAL INDUSTRIES . . . . .	215
APPENDIX C	STANDARDS AND REGULATIONS IN MERCURY EMISSION . . . . .	221
CITED REFERENCES	. . . . .	223
PATENT REFERENCES BY COMPANY	. . . . .	247

## ILLUSTRATIONS

4.1	Chlorine from Salt Electrolysis Comparison of Fixed Capital Investment for Diaphragm Cell Process and Mercury Cell Process . . . . .	30
4.2	Chlorine from Salt Electrolysis Comparison of Production Costs for Diaphragm Cell Process and Mercury Cell Process at Different Capacities and Power Rates . . . . .	31
4.3	Chlorine from Salt Electrolysis Effect of Unit Prices of Steam and Power on Relative Production Costs of Diaphragm Cell Process and Mercury Cell Process . . . . .	32
4.4	Chlorine from Salt Electrolysis Production Cost of Diaphragm Cell Process and Mercury Cell Process Using Brine as Raw Material . . . . .	33
4.5	Comparison of Fixed Capital for Processes Producing Chlorine and Soda Ash . . . . .	36
4.6	Comparison of Production Costs for Processes Producing Chlorine and Soda Ash . . . . .	37
4.7	Capital Investment (Battery Limits plus Utilities) of Processes for Converting HCl to Chlorine . . . . .	40
4.8	Production Cost of Chlorine from Hydrogen Chloride . . .	41
5.1	Chlorine from Salt Electrolysis Diaphragm Cell Process . . . . .	69
5.2	Chlorine from Salt Electrolysis—Diaphragm Cell Process Production Costs at Different Production Levels . . . . .	85
6.1	Chlorine from Salt Electrolysis Mercury Cell Process . . . . .	121
6.2	Chlorine from Salt Electrolysis—Mercury Cell Process Production Costs at Different Production Levels . . . . .	137
7.1	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst . . . . .	155
7.2	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst Production Costs at Different Production Levels . . . . .	165
8.1	Crystallization of Ammonium Chloride . . . . .	182
8.2	Chlorine from Ammonium Chloride Production Costs at Different Production Levels . . . . .	197

## TABLES

2.1	Comparison of Costs of Processes for Making Chlorine from Salt . . . . .	5
2.2	Comparison of Costs of Processes for Recovery of Chlorine from Hydrogen Chloride . . . . .	6
3.1	Chlorine Producers in the United States . . . . .	14
3.2	Chlorine Producers in Canada . . . . .	17
3.3	Chlorine Producers in Europe Except Eastern Bloc . . . . .	18
3.4	Chlorine Producers in Japan . . . . .	22
3.5	Chlorine Producers in Other Countries . . . . .	24
5.1	Metal Anodes Patent Summary . . . . .	44
5.2	Construction Features of Metal Anodes in Diaphragm Cells Patent Summary . . . . .	47
5.3	Bipolar Diaphragm Cells Patent Summary . . . . .	49
5.4	Diaphragm Cells with Graphite Anodes Patent Summary . . . . .	50
5.5	Diaphragms for Chlorine-Alkaline Cells Patent Summary . . . . .	51
5.6	Other Construction Features of Diaphragm Cells Patent Summary . . . . .	54
5.7	Operation of Diaphragm Cells Patent Summary . . . . .	55
5.8	Brine Purification Patent Summary . . . . .	56
5.9	Caustic Soda Recovery and Purification Patent Summary . . . . .	57
5.10	Chlorine Purification, Drying, and Compression Patent Summary . . . . .	58
5.11	Recovery or Removal of Chlorine from a Dilute Chlorine Stream . . . . .	59
5.12	Electrolysis of Dilute Brine or Seawater Patent Summary . . . . .	60

## TABLES

5.13	Characteristics of Some Diaphragm Cells Available for License . . . . .	61
5.14	Chlorine from Salt Electrolysis--Diaphragm Cell Process Important Operation Data . . . . .	67
5.15	Chlorine by Salt Electrolysis--Diaphragm Cell Process Major Process Equipment and Utilities Summary . . . . .	68
5.16	Chlorine from Salt Electrolysis--Diaphragm Cell Process Composition of Stream Flows . . . . .	73
5.17	Chlorine from Salt Electrolysis--Diaphragm Cell Process Waste Streams . . . . .	77
5.18	Chlorine by Salt Electrolysis--Diaphragm Cell Process Total Capital Investment . . . . .	81
5.19	Chlorine by Salt Electrolysis--Diaphragm Cell Process Production Costs . . . . .	83
5.20	Cost for Purification of Caustic Soda . . . . .	88
6.1	Metal Anodes in Mercury Cells Patent Summary . . . . .	92
6.2	Graphite Electrodes for Mercury Cells Patent Summary . . . . .	93
6.3	Electrode Spacing of Mercury Cells Patent Summary . . . . .	94
6.4	Base and Cover of Mercury Cell Patent Summary . . . . .	95
6.5	Electrolyte Movement in Cells Patent Summary . . . . .	95
6.6	Mercury Flow in Cells Patent Summary . . . . .	96
6.7	Other Features in Mercury Cells Patent Summary . . . . .	97

TABLES

6.8	Additives to Mercury Cells Patent and Literature Summary . . . . .	97
6.9	Denuding Vessel Patent Summary . . . . .	98
6.10	Mercury Purification Patent Summary . . . . .	98
6.11	Brine Treatment for Mercury Cells Patent Summary . . . . .	100
6.12	Special Mercury Cells Patent Summary . . . . .	101
6.13	Removal of Mercury from Gas Streams Patent and Literature Summary . . . . .	103
6.14	Removal of Mercury from Caustic Soda Patent and Literature Summary . . . . .	105
6.15	Removal of Mercury from Circulating Brine Patent and Literature Summary . . . . .	106
6.16	Removal of Mercury from Sludges Patent and Literature Summary . . . . .	107
6.17	Removal of Mercury from Aqueous Waste Effluent Patent and Literature Summary . . . . .	108
6.18	Estimated Mercury Loss . . . . .	111
6.19	Some Hoechst-Uhde Mercury Cells . . . . .	113
6.20	Chlorine from Salt Electrolysis—Mercury Cell Process Important Operating Conditions . . . . .	118
6.21	Chlorine from Salt Electrolysis—Mercury Cell Process Major Process Equipment and Utilities Summary . . . . .	119
6.22	Chlorine from Salt Electrolysis—Mercury Cell Process Composition of Stream Flows . . . . .	125
6.23	Chlorine by Salt Electrolysis—Mercury Cell Process Waste Streams . . . . .	129
6.24	Chlorine from Salt Electrolysis—Mercury Cell Process Total Capital Investment . . . . .	133
6.25	Chlorine from Salt Electrolysis—Mercury Cell Process Production Costs . . . . .	135

## TABLES

7.1	Concentrated Hydrochloric Acid from a Dilute HCl Gas Stream or Dilute Acid Patent Summary . . . . .	142
7.2	Anhydrous Hydrogen Chloride from a Solution or a Dilute HCl Gas Stream Patent Summary . . . . .	143
7.3	Chlorine from HCl Electrolysis Patent Summary . . . . .	145
7.4	Chlorine from Oxidation of HCl Using Heterogeneous Catalyst Patent Summary . . . . .	147
7.5	Chlorine from Oxidation with Nitric Acid or Nitrogen Oxides in Homogeneous Phase Patent Summary . . . . .	149
7.6	Other Processes for Converting Hydrogen Chloride to Chlorine . . . . .	151
7.7	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst Reaction Conditions . . . . .	153
7.8	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst Major Process Equipment and Utilities Summary . . . . .	154
7.9	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst Composition of Stream Flows . . . . .	157
7.10	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst Waste Streams . . . . .	158
7.11	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst Total Capital Investment . . . . .	161
7.12	Chlorine from HCl by Oxidation with Nitrogen Oxides as Catalyst Production Costs . . . . .	163
7.13	Chlorine from Electrolysis of Hydrochloric Acid Total Capital Investment . . . . .	167

## TABLES

7.14	Chlorine from Electrolysis of Hydrochloric Acid Production Costs . . . . .	169
7.15	Chlorine from Hydrogen Chloride Oxidation Using a Heterogeneous Catalyst Total Capital Investment . . . . .	171
7.16	Chlorine from Hydrogen Chloride Oxidation Using a Heterogeneous Catalyst Production Costs . . . . .	173
8.1	Chlorine from Ammonium Chloride Patent Summary . . . . .	176
8.2	Electrolysis of Ammonium Chloride Patent Summary . . . . .	177
8.3	Processes Useful in the Disposal of Waste from Solvay Soda Production Patent and Literature Summary . . . . .	179
8.4	Sodium Carbonate by Electrolysis or from Caustic Soda Patent Summary . . . . .	180
8.5	Modified Solvay Process Using Solid Salt Total Capital Investment . . . . .	183
8.6	Modified Solvay Process Using Solid Salt Production Costs . . . . .	185
8.7	Chlorine from Ammonium Chloride Using Air Total Capital Investment . . . . .	189
8.8	Chlorine from Ammonium Chloride Using Air Production Costs . . . . .	191
8.9	Chlorine from Ammonium Chloride Using Oxygen Total Capital Investment . . . . .	193
8.10	Chlorine from Ammonium Chloride Using Oxygen Production Costs . . . . .	195
8.11	Capital Expenditure and Change of Production for Conversion of an Existing Soda Plant from Conventional Solvay Process to Modified Process . . . . .	199
8.12	Payout in Converting Conventional Solvay Soda Process to Modified Solvay Process . . . . .	200

TABLES

8.13	Chlorine and Soda Ash by Electrolysis and Carbonation Total Capital Investment . . . . .	201
8.14	Chlorine and Soda Ash by Electrolysis and Carbonation Production Costs . . . . .	205
8.15	Chlorine by Salt Electrolysis Integrated with the Solvay Process for Making Soda Ash Capital Investment . . . . .	208
8.16	Chlorine by Salt Electrolysis Integrated with the Solvay Process for Making Soda Ash Production Costs . . . . .	209
