## CONTENTS

1	INTRODUCTION . . . . .	1
2	SUMMARY . . . . .	3
3	INDUSTRIAL STATUS . . . . .	19
	In the United States . . . . .	19
	Production . . . . .	19
	Market . . . . .	22
	Trends . . . . .	22
	In Canada . . . . .	23
	In Europe . . . . .	25
	In Japan . . . . .	32
	In Other Countries . . . . .	32-a
4	CHLORINE BY ELECTROLYSIS OF AQUEOUS SODIUM CHLORIDE . . . . .	33
	Chemistry . . . . .	33
	Review of Processes . . . . .	36
	Diaphragm Cells . . . . .	36
	Mercury Cells . . . . .	42
	Dimensionally Stable Anode . . . . .	52
	Chlorine Treatment . . . . .	53
	Processes Using Unconventional Raw Materials or Making Unconventional Products . . . . .	55
	Chlorine by Salt Electrolysis Using a Diaphragm Cell . . . . .	61
	Process Description . . . . .	61
	Process Discussion . . . . .	71
	Cost Estimates . . . . .	72
	Chlorine by Salt Electrolysis Using a Mercury Cell . . . . .	79
	Process Description . . . . .	79
	Process Discussion . . . . .	89
	Cost Estimates . . . . .	91
	Comparison of Costs of Diaphragm Cell Process and Mercury Cell Process . . . . .	98
5	CHLORINE BY ELECTROLYSIS OF HYDROGEN CHLORIDE . . . . .	101
	Cells for Electrolysis of Hydrochloric Acid . . . . .	101
	Process Description . . . . .	103
	Process Discussion . . . . .	110
	Cost Estimates . . . . .	112
	Improvements in the Electrolysis of Hydrochloric Acid . . . . .	119
	Other Processes for Electrolysis of Hydrogen Chloride . . . . .	121

## CONTENTS

5	(continued)	
	Westvaco Copper Chloride Process . . . . .	122
	Schroeder Process . . . . .	124
	Mercury Chloride Process . . . . .	125
6	CHLORINE BY OXIDATION OF HYDROGEN CHLORIDE USING A HETER- OGENEOUS CATALYST . . . . .	127
	Chemistry . . . . .	127
	Review of Processes . . . . .	130
	Process Description . . . . .	140
	Process Discussion . . . . .	146
	Cost Estimates . . . . .	151
7	CHLORINE BY OXIDATION OF HYDROGEN CHLORIDE USING NITRIC ACID . . . . .	161
	Chemistry . . . . .	161
	Review of Processes . . . . .	163
	Process Description . . . . .	164
	Process Discussion . . . . .	175
	Cost Estimates . . . . .	176
8	CHLORINE FROM AMMONIUM CHLORIDE COPRODUCED IN A MODIFIED SOLVAY PROCESS . . . . .	181
	Process Review . . . . .	181
	Coproducton of Ammonium Chloride in Soda Manufacture . . .	181
	Ammonia and Hydrogen Chloride from Ammonium Chloride . . .	188
	Chlorine Directly from Ammonium Chloride . . . . .	190
	A Modified Solvay Process for Production of Soda Ash with Coproducton of Ammonium Chloride . . . . .	196
	Process Description . . . . .	196
	Process Discussion . . . . .	207
	Main Procedures . . . . .	207
	Crystallizer . . . . .	207
	Materials of Construction . . . . .	207
	Ammoniation . . . . .	208
	Calcination . . . . .	208
	Ammonia Still . . . . .	208
	Separation of Products . . . . .	208
	Purity of the Products . . . . .	209
	Cost Estimates . . . . .	209
	Use of Brine as a Raw Material . . . . .	209

## CONTENTS

8	(continued)	
	A Process for the Manufacture of Chlorine from Ammonium Chloride . . . . .	215
	Process Description . . . . .	215
	Process Discussion . . . . .	225
	Cost Estimates . . . . .	227
	Integration of Modified Solvay Process and Chlorine Production from Ammonium Chloride . . . . .	233
	Conversion of a Soda Ash Plant from the Conventional Solvay Process to the Modified Solvay Process . . . . .	234
9	CHLORINE AND SODA ASH BY ELECTROLYSIS . . . . .	243
	Carbonation of Cell Liquor . . . . .	243
	Integration of Electrolysis and Solvay Process . . . . .	244
	A Process for the Manufacture of Soda Ash and Chlorine by Electrolysis and Carbonation . . . . .	253
	Process Description . . . . .	253
	Process Discussion . . . . .	258
	Cost Estimates . . . . .	258
	A Process for Manufacture of Soda Ash and Chlorine by Solvay Process and Salt Electrolysis . . . . .	263
	Comparison of Various Processes for Production of Chlorine and Soda . . . . .	263
10	OTHER PROCESSES FOR CHLORINE MANUFACTURE . . . . .	273
	Chlorine as a By-Product of Sodium Manufacture . . . . .	273
	Chlorine as a By-Product of Magnesium Production . . . . .	274
	Chlorine from Sodium Chloride Using Sulfur Trioxide . . . . .	275
	Chlorine from Metallic Chlorides by Electrolysis . . . . .	276
	Chlorine from Iron Chloride by Oxidation . . . . .	276
	Chlorine from the Waste Liquor of a Solvay Soda Plant . . . . .	277
	Chlorine from Sodium Chloride Using Manganese Dioxide . . . . .	277
	Chlorine from Sodium Chloride Using Siliceous Materials . . . . .	278
	Chlorine from Sodium Chlorate . . . . .	278
	Chlorine by Oxidation of Hydrogen Chloride in a Plasma . . . . .	278
	Chlorine by Thermal Dissociation of Hydrogen Chloride . . . . .	279

CONTENTS

APPENDIX A	DESIGN AND COST BASIS . . . . .	281
APPENDIX B	PHYSICAL DATA . . . . .	285
APPENDIX C	HAZARDS AND SAFETY . . . . .	287
APPENDIX D	SOURCES OF HYDROGEN CHLORIDE AS A RAW MATERIAL FOR CHLORINE PRODUCTION . . . . .	289
CITED REFERENCES	. . . . .	291
PATENT REFERENCES BY COMPANY	. . . . .	343

## ILLUSTRATIONS

4.1	Chlorine from Salt by Electrolysis, Diaphragm Cell Process . . . . .	65
4.2	Chlorine from Salt by Electrolysis, Diaphragm Cell Process Production Costs at Different Production Levels . . . . .	77
4.3	Chlorine from Salt by Electrolysis, Mercury Cell Process . . . . .	83
4.4	Chlorine from Salt by Electrolysis, Mercury Cell Process Production Costs at Different Production Levels . . . . .	97
5.1	Chlorine from Hydrochloric Acid by Electrolysis . . . . .	107
5.2	Chlorine from Hydrochloric Acid by Electrolysis Production Costs at Different Production Levels . . . . .	117
6.1	Chlorine from Hydrogen Chloride by Oxidation . . . . .	143
6.2	Chlorine from Hydrogen Chloride by Oxidation Comparison of Investment Estimates . . . . .	157
6.3	Chlorine from Hydrogen Chloride by Oxidation Using a Heterogeneous Catalyst Production Costs at Different Production Levels . . . . .	158
7.1	Chlorine from Hydrogen Chloride by Oxidation with Nitric Acid . . . . .	171
7.2	Chlorine from Hydrogen Chloride by Oxidation with Nitric Acid Production Costs at Different Production Levels . . . . .	180
8.1	Soda Ash by Modified Solvay Process . . . . .	201
8.2	Chlorine from Ammonium Chloride . . . . .	221
8.3	Chlorine by Modified Solvay Process and Ammonium Chloride Oxidation Production Costs at Different Production Levels . . . . .	235
8.4	Conventional Solvay Process and Modified Solvay Process . . . . .	237
9.1	Electrolysis of the Mother Liquor from Bicarbonate Separation in the Solvay Process . . . . .	252
9.2	Chlorine and Soda Ash by Electrolysis and Carbonation . . . . .	255
9.3	Chlorine and Soda Ash by Solvay Process and Salt Electrolysis . . . . .	264

## ILLUSTRATIONS

9.4	Total Capital Investment for Different Processes for Producing Chlorine and Soda . . . . .	268
9.5	Production Cost of Chlorine with Coproduction of Soda by Different Processes . . . . .	296

## TABLES

2.1	Comparison of Various Processes for Producing Chlorine with Coproduction of Soda . . . . .	5
2.2	Comparison of Processes for Producing Chlorine from Hydrogen Chloride . . . . .	8
2.3	Comparison of Diaphragm Cell and Mercury Cell for Chlorine-Alkali Production . . . . .	10
3.1	Chlorine Producers in the United States . . . . .	20
3.2	Chlorine Producers in Canada . . . . .	24
3.3	Chlorine Producers in Europe . . . . .	26
3.4	Chlorine Producers in Japan . . . . .	31
4.1	Characteristics of Diaphragm Cells Available for License .	37
4.2	Diaphragm Cell Process Patent Summary . . . . .	40
4.3	Characteristics of Mercury Cells Available for License . .	43
4.4	Mercury Cell Process Patent Summary . . . . .	48
4.5	Dimensionally Stable Anodes Patent Summary . . . . .	54
4.6	Liquefaction of Chlorine Patent Summary . . . . .	56
4.7	Recovery or Removal of Chlorine from a Dilute Chlorine Stream Patent Summary . . . . .	57
4.8	Treatment of Chlorine-Containing Gases Patent Summary . . . . .	58
4.9	Chlorine from Seawater by Electrolysis Patent Summary . . . . .	59
4.10	Chlorine by Salt Electrolysis, Diaphragm Cell Process Major Process Equipment . . . . .	65
4.11	Chlorine by Salt Electrolysis, Diaphragm Cell Process Stream Flows . . . . .	69
4.12	Chlorine by Salt Electrolysis, Diaphragm Cell Process Total Capital Investment . . . . .	73

## TABLES

4.13	Chlorine by Salt Electrolysis, Diaphragm Cell Process Production Costs . . . . .	75
4.14	Chlorine by Salt Electrolysis, Mercury Cell Process Major Process Equipment and Utilities Summary . . . . .	81
4.15	Chlorine by Salt Electrolysis, Mercury Cell Process Stream Flows . . . . .	87
4.16	Chlorine by Salt Electrolysis, Mercury Cell Process Total Capital Investment . . . . .	93
4.17	Chlorine by Salt Electrolysis, Mercury Cell Process Production Costs . . . . .	95
5.1	Cells for Electrolysis of Hydrochloric Acid Patent Summary . . . . .	102
5.2	Chlorine by Electrolysis of Hydrochloric Acid Major Process Equipment and Utilities Summary . . . . .	107
5.3	Chlorine by Electrolysis of Hydrochloric Acid Stream Flows . . . . .	109
5.4	Chlorine by Electrolysis of Hydrochloric Acid Total Capital Investment . . . . .	113
5.5	Chlorine by Electrolysis of Hydrochloric Acid Production Costs . . . . .	115
5.6	Devices for Reducing Voltage for Hydrochloric Acid Electrolysis Patent Summary . . . . .	120
6.1	Chlorine by Hydrogen Chloride Oxidation Using a Heter- ogeneous Catalyst Patent Summary . . . . .	131
6.2	Chlorine by Hydrogen Chloride Oxidation Using a Heter- ogeneous Catalyst Major Process Equipment and Utilities Summary . . . . .	143
6.3	Chlorine by Hydrogen Chloride Oxidation Using a Heter- ogeneous Catalyst Stream Flows . . . . .	145
6.4	Comparison of Processes Using Air and Oxygen for Oxidation of Hydrogen Chloride Major Process Equipment and Utilities Summary . . . . .	150

## TABLES

6.5	Chlorine by Hydrogen Chloride Oxidation Using a Heterogeneous Catalyst Total Capital Investment . . . . .	153
6.6	Chlorine by Hydrogen Chloride Oxidation Using a Heterogeneous Catalyst Production Costs . . . . .	155
6.7	Chlorine by Hydrogen Chloride Oxidation Using Oxygen Production Costs . . . . .	159
7.1	Chlorine from Hydrogen Chloride or Alkali Chloride by Oxidation with Nitric Acid or Related Compounds Patent Summary . . . . .	165
7.2	Chlorine from Nitrosyl Chloride Patent Summary . . . . .	167
7.3	Chlorine from Hydrogen Chloride by Oxidation with Nitric Acid Major Process Equipment and Utilities Summary . . . . .	171
7.4	Chlorine from Hydrogen Chloride by Oxidation with Nitric Acid Stream Flows . . . . .	173
7.5	Chlorine from Hydrogen Chloride by Oxidation with Nitric Acid Total Capital Investment . . . . .	178
7.6	Chlorine from Hydrogen Chloride by Oxidation with Nitric Acid Production Costs . . . . .	179
8.1	Production of Ammonium Chloride as a Coproduction of Soda Ash Manufacture by the Solvay Process Patent Summary . . . . .	183
8.2	Ammonia and Hydrochloric Acid from Ammonium Chloride Patent Summary . . . . .	189
8.3	Chlorine from Ammonium Chloride Patent Summary . . . . .	191
8.4	Soda Ash by Modified Solvay Process with Coproduction of Ammonium Chloride Major Process Equipment and Utilities Summary . . . . .	201

## TABLES

8.5	Soda Ash by Modified Solvay Process with Coproduction of Ammonium Chloride Stream Flows . . . . .	205
8.6	Soda Ash by Modified Solvay Process Total Capital Investment . . . . .	211
8.7	Soda Ash by Modified Solvay Process Production Costs . . . . .	213
8.8	Chlorine from Ammonium Chloride Major Process Equipment and Utilities Summary . . . . .	219
8.9	Chlorine from Ammonium Chloride Stream Flows . . . . .	223
8.10	Chlorine from Ammonium Chloride Total Capital Investment . . . . .	229
8.11	Chlorine from Ammonium Chloride Production Costs . . . . .	231
8.12	Soda Ash Production Cost Changes by Converting an Existing Conventional Solvay Process to a Modified Process . . . . .	240
8.13	Payout in Converting a Conventional Solvay Soda Ash Process to a Modified Solvay Process . . . . .	241
9.1	Sodium Carbonate from Electrolytic Cell Liquor Patent Summary . . . . .	245
9.2	Integration of Salt Electrolysis and Solvay Process Patent Summary . . . . .	249
9.3	Chlorine with Coproduction of Soda Ash by Electrolysis and Carbonation Major Process Equipment and Utilities Summary . . . . .	255
9.4	Chlorine with Coproduction of Soda Ash by Electrolysis and Carbonation Stream Flows . . . . .	257
9.5	Chlorine with Coproduction of Soda Ash by Electrolysis and Carbonation Battery Limits and Utilities Cost of Carbonation Section .	259
9.6	Chlorine with Coproduction of Soda Ash by Electrolysis and Carbonation Total Capital Investment . . . . .	260

## TABLES

9.7	Chlorine with Coproduction of Soda Ash by Electrolysis and Carbonation Production Costs . . . . .	261
9.8	Chlorine by Integrated Solvay Process and Salt Electrolysis Total Capital Investment . . . . .	265
9.9	Chlorine by Integrated Solvay Process and Salt Electrolysis Production Cost . . . . .	266
9.10	Comparison of Payoff Period of Different Processes at Various Rates of Chlorine Production . . . . .	270
