

Report No. 69

ACETAL RESINS

by GEORGE E. HADDELAND

June 1971

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	3
3	INDUSTRY STATUS	11
	History	11
	Acetal Resin Production	12
	Acetal Resin Applications	14
	Competitive Materials and Prices	19
	Raw Materials	23
4	CHEMISTRY	25
	Structure and Nomenclature	25
	Polymerization of Formaldehyde	27
	Mechanism	27
	Kinetics	30
	Polymerization of Trioxane	34
	Mechanism	34
	Kinetics	37
	Polymerization States	39
	Copolymerization of Trioxane	39
	Comonomers	39
	Mechanism and Kinetics	41
	Polymerization of Higher Aldehydes	44
	Halogenated Aldehyde Polymers	47
5	STABILIZATION OF ACETAL RESINS	49
	Kinds of Instability	49
	Depolymerization from Chain Ends	49
	Autooxidative Degradation	50
	Degradation by Secondary Products of Oxidation	51
	Thermal Degradation	52
	Acidolysis and Hydrolysis	52
	Stabilization Methods	53
	Esterification and Etherification of Chain Ends	53
	Copolymerization	70
	Additives	87

CONTENTS

6	ACETAL RESIN FROM FORMALDEHYDE	103
	Review of Technology	103
	Processing Routes	103
	Polymerization Systems	107
	Catalysts and Initiators	118
	Molecular Weight Control	129
	Polymer Stability and Toughness	130
	Purification	132
	Process Description	132
	Process Discussion	149
	Cost Estimates	150
	Capital Costs	150
	Production Costs	153
	Discussion of Costs	153
7	COPOLYMER ACETAL RESIN FROM TRIOXANE	159
	Review of Technology	159
	Processing Routes	159
	Solution-Suspension Polymerizations	164
	Polymerization Catalysts	172
	Polymer Chain End Stabilization	173
	Process Description	183
	Process Discussion	197
	Cost Estimates	198
	Capital Investment	198
	Production Costs	198
	Discussion of Costs	199
8	IRRADIATION POLYMERIZATION OF FORMALDEHYDE OR TRIOXANE	209
	Review of Technology	209
	Formaldehyde	215
	Trioxane	217
	Process Description	223
	Process Discussion	228
	Cost Estimates	229
	Capital Costs	229
	Production Costs	230
	Discussion of Costs	230

CONTENTS

9	OTHER PROCESSES	237
	Tenneco Chemicals	237
	Diamond Shamrock	239
	W. R. Grace & Company	239
	Asahi Chemical	240
	Farbwerke Hoechst	241
	BASF, DEGUSSA	241
	Società Italiana Resine	242
	APPENDIX A DESIGN AND COST BASIS	245
	APPENDIX B PHYSICAL DATA	251
	APPENDIX C POLYMER PROPERTIES	257
	APPENDIX D MATERIALS OF CONSTRUCTION, HANDLING, SAFETY, AND POLLUTION	261
	APPENDIX E TEST METHODS AND TERMINOLOGY	267
	REFERENCES	269
	PATENT REFERENCES BY COMPANY	329

ILLUSTRATIONS

3.1	Consumption of Acetal Resins in the United States, Western Europe, and Japan and Estimated Production Capacity in These Three Areas	13
5.1	Acetylation Rate vs Sodium Acetate Catalyst Concentration	55
5.2	Polymer Weight Loss in Air at 230° C as a Function of Time	85
5.3	Polymer Weight Loss in Limited Air at 230 and 250° C	86
6.1	Alternative Processing Routes for Acetal Resins from Formaldehyde	105
6.2	Polyoxymethylene Stability in Formaldehyde Solution	119
6.3	Degradation Rate and Toughness of Formaldehyde Polymers	131
6.4	Acetal Resin from Formaldehyde Flow Diagram	137
6.5	Influence of Plant Design Capacity, Stream Factor, and Methanol Cost on the Total Production Cost of Acetal Homopolymer Resin from Formaldehyde	157
7.1	Mono- and Copolymer Acetal Resins from Trioxane Alternative Processing Routes	161
7.2	Trioxane-Ethylene Oxide Copolymers Influence of Solvent and Catalyst Concentration on the Molecular Weight	171
7.3	Copolymer Acetal Resin from Trioxane Flow Diagram	187
7.4	Copolymer Acetal Resin from Ethylene Oxide and Formaldehyde via Trioxane Production Costs for Various Plant Capacities and Stream Factors	207
8.1	Conversion as a Function of Polymerization Time, and Viscosity as a Function of Conversion for Irradiation Polymerization of Trioxane	218
8.2	Polymer Yield as a Function of Postpolymerization Time	220
8.3	The Irradiation Polymerization of Trioxane Flow Diagram	225

ILLUSTRATIONS

B.1	Heat Capacity and Heat of Vaporization of Formaldehyde, Trioxane, and Acetal Resin	255
E.1	Acetal Resin Molecular Weight from Inherent Viscosity . . .	267

TABLES

2.1	Summary of Acetal Resin Capital and Manufacturing Costs by Catalytic Processes	5
3.1	Acetal Resin Producers	15
3.2	Acetal Resin Markets in the United States	18
3.3	Properties of Acetal Resins Compared with Those of Other Plastics and Metals	21
4.1	Effect of Initiators on Cationic Polymerization of Trioxane in a 50 wt% Solution of Cyclohexane at 60°C . . .	36
4.2	Polymerization of Trioxane in the Various States	40
4.3	Copolymers of Trioxane with Cyclic Formals and Epoxy Compounds	42
5.1	End-Group Stabilization of Acetal Resins Patent Summary	57
5.2	End-Group Stabilization of Acetal Resins	69
5.3	Formaldehyde or Trioxane Copolymers Patent Summary	71
5.4	Stabilizer Additives for Acetal Resins Patent Summary	89
6.1	Processes for the Polymerization of Formaldehyde Patent Summary	109
6.2	Catalysts and Initiators for the Polymerization of Formaldehyde Patent Summary	121
6.3	Acetal Resin from Formaldehyde Major Process Equipment and Utilities Summary	136
6.4	Acetal Resin from Formaldehyde Stream Flows	145
6.5	Acetal Resin from Formaldehyde Total Capital Investment	151
6.6	Acetal Resin from Formaldehyde Production Costs	151
7.1	Processes for the Polymerization of Trioxane Polymers and Copolymers Patent Summary	165

TABLES

7.2	Catalysts and Initiators for the Polymerization of Trioxane Polymers and Copolymers Patent Summary	175
7.3	Thermal Stabilization of Trioxane Copolymer Chain Ends Patent Summary	181
7.4	Copolymer Acetal Resin from Trioxane Major Process Equipment and Utilities Summary	187
7.5	Copolymer Acetal Resin from Trioxane Stream Flows	193
7.6	Copolymer Acetal Resin from Trioxane Total Capital Investment	203
7.7	Copolymer Acetal Resin from Trioxane Production Costs	205
8.1	Irradiation Polymerization of Formaldehyde or Trioxane Patent Summary	211
8.2	Properties of Preirradiated Postpolymerized Polyoxymethylene as Compared with Those of Commercial Polyformaldehyde Resin	219
8.3	Irradiation Polymerization of Trioxane Major Process Equipment and Utilities Summary	225
8.4	Irradiation Polymerization of Trioxane Stream Flows	227
8.5	Irradiation Polymerization of Trioxane Total Capital Investment	233
8.6	Irradiation Polymerization of Trioxane Production Costs	235
B.1	Properties of Trioxane and Ethylene Oxide	253
B.2	Properties of Solvents	254
C.1	Properties of Acetal Resins	258
C.2	Chemical Resistance of Copolymer Acetal Resin	260
