

Report No. 72

PETROLEUM COKE

by SAMUEL C. SPENCER

October 1971

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	5
	Economic Aspects	6
	Technical Aspects	10
3	INDUSTRY STATUS	17
	Trends	17
	Applications	29
	Fuel	31
	Aluminum (anodes)	32
	Metallurgical Coke	36
	Chemicals	37
	Formed Shapes	38
	Other Uses	39
4	DEVELOPMENT OF COKING PROCESSES	41
5	CHEMISTRY	47
	Composition	47
	Basic Chemistry	52
6	DELAYED COKING	59
	Review of Process	59
	Process Description	68
	Materials of Construction	83
	Process Discussion	84
	Process Variations and Innovations	93
	Cost Estimates	95
	Capital Costs	96
	Production Costs	100
	Needle Coke Economics	112

CONTENTS

7	FLUID COKING	119
	Review of Process	119
	Process Description	129
	Materials of Construction	133
	Process Discussion	140
	Process Variations and Innovations	144
	Cost Estimates	149
	Capital Costs	150
	Production Costs	153
	Flexicoking	164
8	CALCINING OF COKE	167
	Technology	167
	Industry Status	170
	Process	171
	Innovations and Developments	175
	Cost Estimates	177
9	DESULFURIZATION OF COKE	181
10	REMOVAL OF ASH AND METALLIC CONTAMINANTS FROM COKE	189
11	GRAPHITE FROM COKE	193
12	INNOVATIONS AND DEVELOPMENTS IN COKE TECHNOLOGY	203
	APPENDIX A DESIGN AND COST BASIS	209
	CITED REFERENCES	213
	PATENT REFERENCES BY COMPANY	243

ILLUSTRATIONS

2.1	Coke Yield vs Conradson Carbon Content	14
3.1	Capacity of Residual Upgrading Installations in the United States	19
3.2	Coke Production as Percentage of Crude Oil Processed in the United States	20
3.3	Schematic of Role of Coking in Petroleum Refining	21
5.1	Change in the Physicochemical Properties of Coke on Heating	57
6.1	Petroleum Coke by Delayed Process Relationship Between Coke Yield and Feedstock Gravity and Carbon Content	61
6.2	Petroleum Coke By Delayed Process Effect of Feedstock Gravity on Yields of All Products	62
6.3	Petroleum Coke by Delayed Process Effect of Recycle Ratio on Yields	64
6.4	Petroleum Coke by Delayed Process Processing Operations	77
6.5	Petroleum Coke by Delayed Process Product Handling	81
6.6	Petroleum Coke by Delayed Process Zone of Critical Decomposition	86
6.7	Petroleum Coke by Delayed Process Influence of Capital Investment on Payout Period	109
6.8	Petroleum Coke by Delayed Process Influence of Heavy Gas Oil Value on Payout Period	110
6.9	Petroleum Coke by Delayed Process Influence of Coke Value on Payout Period	111
7.1	Petroleum Coke by Fluid Process Maximum Permissible Feed Rate vs Coke Yield	123

ILLUSTRATIONS

7.2	Petroleum Coke by Fluid Process Maximum Feed Rate at Various Conversion Rates	125
7.3	Petroleum Coke by Fluid Process Feed Rate vs Fluid Coking Temperature	126
7.4	Petroleum Coke by Fluid Process Processing Operations	137
7.5	Petroleum Coke by Fluid Process Capital Investment, Battery Limits Plant	156
7.6	Petroleum Coke by Fluid Process Influence of Capital Investment on Payout Period	160
7.7	Petroleum Coke by Fluid Process Influence of Gasoline Value on Payout Period	161
7.8	Petroleum Coke by Fluid Process Influence of Heavy Gas Oil Value on Payout Period	162
7.9	Petroleum Coke by Fluid Process Influence of Coke Value on Payout Period	163
7.10	Flexicoking	166
11.1	Variation in Properties Across Radius of a 13 Inch Diameter Extruded Fine-Grained Graphite Cylinder	198
11.2	Change in Room Temperature Resistivity of a Graphite Rod in Relation to Temperature of Graphitization	198
11.3	Resistivity of Graphite Electrodes vs Temperature	199
11.4	Thermal Conductivity of Fabricated Graphite	199
11.5	Mean Specific Heat of Graphite	200
11.6	Longitudinal Thermal Expansion of Fabricated Graphite	200

TABLES

2.1	Summary of Coking Economics	8
3.1	Production of Green Petroleum Coke	23
3.2	Petroleum Coke Plant Capacities in the United States . . .	24
3.3	Petroleum Coke Plant Capacities in Canada	25
3.4	Coker Feed and Coke Output Capacities in the United States	25
3.5	Coke Requirements for Aluminum Production	26
3.6	Petroleum Coke Calcining Capacities in the Free World . .	27
3.7	Annual Coke Consumption in Japan	28
3.8	Comparison of Fuel Characteristics	31
3.9	Estimated Requirements for Carbon Components in Anode Manufacture at Selected Alumina Reduction Plants in the United States	34
3.10	Representative Specifications for Cokes for Use in the Manufacture of Electrodes for Alumina Reduction Plants on the West Coast	35
4.1	Properties of Petroleum Cokes	45
5.1	Representative Analyses of Selected Raw Cokes and Other Carbonaceous Materials	48
5.2	Representative Analyses of Raw Delayed Cokes	48
5.3	Representative Analyses of Raw Fluid Cokes	49
5.4	Typical Ranges for Analyses of Petroleum Cokes	50
6.1	Petroleum Coke by Delayed Process Major Process Equipment and Utilities Summary	77
6.2	Petroleum Coke by Delayed Process Stream Flows	80
6.3	Petroleum Coke by Delayed Process Major Product Handling Equipment Summary	81

TABLES

6.4	Petroleum Coke by Delayed Process Total Capital Investment	104
6.5	Petroleum Coke Handling by Coke Pit System Total Capital Investment	105
6.6	Petroleum Coke by Delayed Process Annual Production Costs	106
6.7	Petroleum Coke by Delayed Process Profitability--Payout of Investment	107
6.8	Petroleum Coke by Delayed Process Coke Handling Costs	108
6.9	Needle Coke/Regular Coke Total Capital Investment	114
6.10	Petroleum Coke by Delayed Process, Including Needle Coke on Blocked Operations Annual Production Costs	115
6.11	Petroleum Coke by Delayed Process, Including Needle Coke on Blocked Operations Profitability--Payout of Investment	117
7.1	Petroleum Coke by Fluid Process Effect of Recycle Cut Point on Product Distribution . . .	121
7.2	Petroleum Coke by Fluid Process Major Process Equipment and Utilities Summary	137
7.3	Petroleum Coke By Fluid Process Stream Flows	139
7.4	Petroleum Coke by Fluid Process Operating for Higher Butene Yields	143
7.5	Petroleum Coke by Fluid Process Total Capital Investment	157
7.6	Petroleum Coke by Fluid Process Annual Production Costs	158

TABLES

7.7	Petroleum Coke by Fluid Process Profitability--Payout of Investment	159
8.1	Typical Properties of Petroleum Coke Used in Carbon and Graphite Manufacture	168
8.2	Petroleum Coke Calcining Locations	172
8.3	Petroleum Coke Calcining Total Capital Investment	179
8.4	Petroleum Coke Calcining Production Costs	180
9.1	Sulfur Content of a Few Petroleum Cokes	182
11.1	Characteristic Room Temperature Physical Properties of Fine-Grained Extruded Graphite	194
11.2	Effect of Grain Size on Properties of Extruded Graphite. .	195
11.3	Comparison of Physical Properties of Fine-Grained Graphite--Molded and Extruded	196
11.4	Effect of Grain Size on Anisotropy of Graphite	196
11.5	Other Typical Physical Properties of Graphite	197
