

Report No. 77

**ACETONE, METHYL ETHYL  
KETONE AND  
METHYL ISOBUTYL  
KETONE**

by SHIGEYOSHI TAKAOKA

May 1972

A private report by the

**PROCESS ECONOMICS PROGRAM**

**STANFORD RESEARCH INSTITUTE**

**MENLO PARK, CALIFORNIA**

## CONTENTS

1	INTRODUCTION . . . . .	1
2	SUMMARY . . . . .	3
	Acetone . . . . .	3
	Methyl Ethyl Ketone . . . . .	6
	Methyl Isobutyl Ketone . . . . .	11
3	INDUSTRY STATUS . . . . .	15
	Acetone . . . . .	15
	Methyl Ethyl Ketone . . . . .	20
	Secondary Butanol . . . . .	21
	Methyl Isobutyl Ketone . . . . .	22
	Diacetone Alcohol . . . . .	25
	Mesityl Oxide . . . . .	26
4	ACETONE BY DEHYDROGENATION OF ISOPROPANOL . . . . .	27
	Chemistry . . . . .	27
	Mechanism . . . . .	27
	Kinetics . . . . .	28
	Review of Processes . . . . .	30
	Feed Specifications . . . . .	31
	Catalyst . . . . .	31
	Reactor . . . . .	38
	Temperature and Pressure . . . . .	38
	Space Velocity . . . . .	38
	Conversion, Selectivity, and Yield . . . . .	39
	By-products . . . . .	39
	Product Purification . . . . .	39
	Process Description . . . . .	40
	Process Discussion . . . . .	46
	Cost Estimates . . . . .	48
	Capital Costs . . . . .	48
	Production Costs . . . . .	49
5	ACETONE BY DIRECT OXIDATION OF PROPYLENE . . . . .	59
	Chemistry . . . . .	59
	Review of Processes . . . . .	64
	Feed Specifications . . . . .	71
	Catalyst . . . . .	71
	Reactor . . . . .	72

## CONTENTS

5	(continued)		
		Temperature and Pressure . . . . .	73
		Conversion, Selectivity, and Yield . . . . .	73
		By-products . . . . .	74
		Product Purification . . . . .	74
		Material of Construction . . . . .	75
		Other Propylene Oxidation Processes . . . . .	76
		Process Description . . . . .	76
		Process Discussion . . . . .	83
		Cost Estimates . . . . .	86
		Capital Costs . . . . .	86
		Production Costs . . . . .	86
6	ACETONE BY OTHER PROCESSES . . . . .		93
	Cumene Hydroperoxide Process . . . . .		93
	Oxidation of Isopropanol . . . . .		94
	Reaction of Acetylene and Steam . . . . .		95
	Oxidation of Light Paraffinic Hydrocarbons . . . . .		96
	Ketonization of Acetic Acid . . . . .		96
	Reaction of Acetaldehyde and Steam . . . . .		97
	Reaction of Propylene and Acetic Acid . . . . .		97
	Isomerization of Propylene Oxide . . . . .		98
	Various Other Processes . . . . .		98
7	SECONDARY BUTANOL BY SULFATION AND HYDROLYSIS OF NORMAL BUTYLENES . . . . .		101
	Chemistry . . . . .		101
	Review of Processes . . . . .		102
	Sulfation . . . . .		102
	Hydrolysis . . . . .		104
	Purification . . . . .		104
	Process Description . . . . .		106
	Process Discussion . . . . .		114
	Cost Estimates . . . . .		118
	Capital Costs . . . . .		118
	Production Costs . . . . .		118

## CONTENTS

8	<b>METHYL ETHYL KETONE BY DEHYDROGENATION OF SECONDARY BUTANOL</b> . . . . .	123
	Chemistry . . . . .	123

	Process Discussion . . . . .	179
	Cost Estimates . . . . .	181
	Capital Costs . . . . .	181
	Production Costs . . . . .	182
10	<b>METHYL ETHYL KETONE BY OTHER PROCESSES</b> . . . . .	189
	Oxidation of Light Hydrocarbons . . . . .	189
	sec-Butylbenzene Hydroperoxide Process . . . . .	190
	Oxidation of sec-Butanol . . . . .	190
	Isomerization of Butylene Oxide . . . . .	191
	Isomerization of Isobutyl Aldehyde . . . . .	191
	Electrochemical Oxidation of n-Butylenes . . . . .	191
	Various Other Processes . . . . .	192

## CONTENTS

11	METHYL ISOBUTYL KETONE FROM ACETONE VIA MESITYL OXIDE . . .	193
	Chemistry . . . . .	193
	Condensation of Acetone to Diacetone Alcohol . . . . .	193
	Dehydration of Diacetone Alcohol to Mesityl Oxide . . . . .	196
	Condensation-Dehydration of Acetone to Mesityl Oxide . . . . .	196
	Hydrogenation of Mesityl Oxide to Methyl Isobutyl Ketone . . . . .	198
	Review of Processes . . . . .	199
	Diacetone Alcohol by Condensation of Acetone . . . . .	199
	Mesityl Oxide by Dehydration of Diacetone Alcohol . . . . .	201
	Mesityl Oxide by Condensation-Dehydration of Acetone . . . . .	207
	Methyl Isobutyl Ketone by Hydrogenation of Mesityl Oxide . . . . .	208
	Process Description . . . . .	211
	Process Discussion . . . . .	221
	Cost Estimates . . . . .	223
	Capital Costs . . . . .	223
	Production Costs . . . . .	223
12	METHYL ISOBUTYL KETONE BY DIRECT CONDENSATION OF ACETONE . . .	233
	Chemistry . . . . .	233
	Review of Processes . . . . .	235
	Process Description . . . . .	239
	Process Discussion . . . . .	246
	Cost Estimates . . . . .	246
	Capital Costs . . . . .	246
	Production Costs . . . . .	246
13	METHYL ISOBUTYL KETONE BY OTHER PROCESSES . . . . .	253
	Catalytic Condensation of Isopropanol and Acetone . . . . .	253
	Catalytic Condensation of Isopropanol . . . . .	253
	Oxidation of 4-Methyl-1-pentene . . . . .	253
APPENDIX A	DESIGN AND COST BASIS . . . . .	255
APPENDIX B	PHYSICAL PROPERTIES . . . . .	261
APPENDIX C	RAW MATERIAL AND PRODUCT SPECIFICATIONS . . . . .	265
APPENDIX D	SAFETY . . . . .	269
APPENDIX E	RULE 66 OF THE LOS ANGELES, CALIFORNIA AIR POLLUTION CONTROL DISTRICT . . . . .	271

PATENT REFERENCES BY COMPANY	. . . . .	313

## ILLUSTRATIONS

4.1	Acetone by Vapor Phase Dehydrogenation of Isopropanol . . .	43
4.2	Acetone from Propylene by Two-Step Process Effect of Plant Capacity on Capital Investment . . . . .	53
4.3	Acetone from Propylene by Two-Step Process Effect of Propylene Price on Net Production Cost of Acetone . . . . .	56
4.4	Acetone from Propylene by Two-Step Process Effect of Operating Level and Production Capacity on Net Production Cost of Acetone . . . . .	57
5.1	Effect of Palladium Ligand and Acid Concentration on Propionaldehyde Formation . . . . .	62
5.2	Absorption Rate of Various Olefins in 0.1 Molar PdCl <sub>2</sub> Solution at 20°C . . . . .	63
5.3	Acetone by Direct Oxidation of Propylene . . . . .	79
5.4	Acetone by Direct Oxidation of Propylene Effect of Plant Capacity on Capital Investment . . . . .	89
5.5	Acetone by Direct Oxidation of Propylene Effect of Propylene Price on Net Production Cost of Acetone . . . . .	91
5.6	Acetone by Direct Oxidation of Propylene Effect of Operating Level and Production Capacity on Net Production Cost of Acetone . . . . .	92
7.1	Secondary Butanol by Sulfation and Hydrolysis of Normal Butylenes . . . . .	111
7.2	Material Selection Chart for Sulfuric Acid . . . . .	117
8.1	Effect of Zinc Content in the Brass Catalyst on the Yield of Methyl Ethyl Ketone . . . . .	127
8.2	Effect of Space Velocity and Temperature on the Yield of Methyl Ethyl Ketone . . . . .	128
8.3	Effect of Impurities in the Secondary Butanol on the Yield of Methyl Ethyl Ketone . . . . .	133
8.4	Methyl Ethyl Ketone by Dehydrogenation of Secondary Butanol . . . . .	141
8.5	Methyl Ethyl Ketone from Normal Butylenes by Two-Step Process Effect of Plant Capacity on Capital Investment . . . . .	150

## ILLUSTRATIONS

8.6	Methyl Ethyl Ketone from Normal Butylenes by Two-Step Process Effect of Normal Butylene Price on Net Production Cost of Methyl Ethyl Ketone . . . . .	152
8.7	Methyl Ethyl Ketone from Normal Butylenes by Two-Step Process Effect of Operating Level and Production Capacity on Net Production Cost of Methyl Ethyl Ketone . . . . .	153
9.1	Absorption of Normal Butylenes in Catalyst Solution . . .	157
9.2	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes . . . . .	173
9.3	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Effect of Plant Capacity on Capital Investment . . . . .	184
9.4	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Effect of Normal Butylene Price on Net Production Cost of Methyl Ethyl Ketone . . . . .	186
9.5	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Effect of Operating Level and Production Capacity on Net Production Cost of Methyl Ethyl Ketone . . . . .	187
11.1	Condensation of Acetone to Diacetone Alcohol Effect of Temperature on the Equilibrium Constant and the Rate Constant . . . . .	195
11.2	Methyl Isobutyl Ketone from Acetone via Mesityl Oxide . .	217
11.3	Methyl Isobutyl Ketone from Acetone via Mesityl Oxide Effect of Plant Capacity on Capital Investment . . . . .	227
11.4	Methyl Isobutyl Ketone from Acetone via Mesityl Oxide Effect of Acetone Price on Total Production Cost of Methyl Isobutyl Ketone . . . . .	231
11.5	Methyl Isobutyl Ketone from Acetone via Mesityl Oxide Effect of Operating Level and Production Capacity on Total Production Cost of Methyl Isobutyl Ketone . . . . .	232
12.1	Methyl Isobutyl Ketone by Direct Condensation of Acetone .	243

## ILLUSTRATIONS

12.2	Methyl Isobutyl Ketone by Direct Condensation of Acetone Effect of Plant Capacity on Capital Investment . . . . .	249
12.3	Methyl Isobutyl Ketone by Direct Condensation of Acetone Effect of Acetone Price on Total Production Cost of Methyl Isobutyl Ketone . . . . .	251
12.4	Methyl Isobutyl Ketone by Direct Condensation of Acetone Effect of Operating Level and Production Capacity on Total Production Cost of Methyl Isobutyl Ketone . . . . .	252
B.1	Mutual Solubility of Methyl Ethyl Ketone and Water as a Function of Temperature . . . . .	264
B.2	Mutual Solubility of Methyl Isobutyl Ketone and Water as a Function of Temperature . . . . .	264

## TABLES

2.1	Summary of Economics of Acetone Processes . . . . .	5
2.2	Summary of Technical Characteristics of Secondary Butanol and Various Ketone Processes . . . . .	7
2.3	Summary of Economics of Secondary Butanol and Methyl Ethyl Ketone Processes . . . . .	10
2.4	Summary of Economics of Methyl Isobutyl Ketone Processes .	12
3.1	Acetone Plant Capacities North and South America . . . . .	17
3.2	Acetone Plant Capacities Europe . . . . .	18
3.3	Acetone Plant Capacities Japan and India . . . . .	19
3.4	Methyl Ethyl Ketone Plant Capacities . . . . .	24
3.5	Methyl Isobutyl Ketone Plant Capacities . . . . .	24
4.1	Acetone by Dehydrogenation of Isopropanol Patent Summary . . . . .	33
4.2	Acetone by Vapor Phase Dehydrogenation of Isopropanol Major Process Equipment and Utilities Summary . . . . .	42
4.3	Acetone by Vapor Phase Dehydrogenation of Isopropanol Stream Flows . . . . .	45
4.4	Acetone by Vapor Phase Dehydrogenation of Isopropanol Total Capital Investment . . . . .	51
4.5	Acetone from Propylene by Two-Step Process Total Capital Investment . . . . .	52
4.6	Acetone by Vapor Phase Dehydrogenation of Isopropanol Direct Operating Costs . . . . .	54
4.7	Acetone from Propylene by Two-Step Process Production Costs . . . . .	55
5.1	Acetone by Direct Oxidation of Propylene Patent Summary . . . . .	65
5.2	Acetone by Direct Oxidation of Propylene Major Process Equipment and Utilities Summary . . . . .	78
5.3	Acetone by Direct Oxidation of Propylene Stream Flows . . . . .	81

## TABLES

5.4	Acetone by Direct Oxidation of Propylene Total Capital Investment . . . . .	88
5.5	Acetone by Direct Oxidation of Propylene Production Costs . . . . .	90
7.1	Secondary Butanol by Sulfation and Hydrolysis of Normal Butylenes Major Process Equipment and Utilities Summary . . . . .	109
7.2	Secondary Butanol by Sulfation and Hydrolysis of Normal Butylenes Stream Flows . . . . .	113
7.3	Secondary Butanol by Sulfation and Hydrolysis of Normal Butylenes Total Capital Investment . . . . .	119
7.4	Secondary Butanol by Sulfation and Hydrolysis of Normal Butylenes Production Costs . . . . .	121
8.1	Methyl Ethyl Ketone by Dehydrogenation of Secondary Butanol Patent Summary . . . . .	129
8.2	Methyl Ethyl Ketone by Dehydrogenation of Secondary Butanol Major Process Equipment and Utilities Summary . . . . .	139
8.3	Methyl Ethyl Ketone by Dehydrogenation of Secondary Butanol Stream Flows . . . . .	143
8.4	Methyl Ethyl Ketone by Dehydrogenation of Secondary Butanol Total Capital Investment . . . . .	147
8.5	Methyl Ethyl Ketone from Normal Butylenes by Two-Step Process Total Capital Investment . . . . .	149
8.6	Methyl Ethyl Ketone from Normal Butylenes by Two-Step Process Production Costs . . . . .	151
9.1	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Patent Summary . . . . .	159

## TABLES

9.2	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Major Process Equipment and Utilities Summary . . . . .	171
9.3	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Stream Flows . . . . .	175
9.4	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Total Capital Investment . . . . .	183
9.5	Methyl Ethyl Ketone by Direct Oxidation of Normal Butylenes Production Costs . . . . .	185
11.1	Mesityl Oxide by Diacetone Alcohol Dehydration or by Acetone Condensation Patent Summary . . . . .	203
11.2	Methyl Isobutyl Ketone by Hydrogenation of Mesityl Oxide Patent Summary . . . . .	209
11.3	Methyl Isobutyl Ketone from Acetone via Mesityl Oxide Major Process Equipment and Utilities Summary . . . . .	215
11.4	Methyl Isobutyl Ketone from Acetone via Mesityl Oxide Stream Flows . . . . .	219
11.5	Methyl Isobutyl Ketone from Acetone via Mesityl Oxide Total Capital Investment . . . . .	225
11.6	Mesityl Isobutyl Ketone from Acetone via Mesityl Oxide Production Costs . . . . .	229
12.1	Methyl Isobutyl Ketone by Direct Condensation of Acetone Patent Summary . . . . .	237
12.2	Methyl Isobutyl Ketone by Direct Condensation of Acetone Major Process Equipment and Utilities Summary . . . . .	242
12.3	Methyl Isobutyl Ketone by Direct Condensation of Acetone Stream Flows . . . . .	245
12.4	Methyl Isobutyl Ketone by Direct Condensation of Acetone Total Capital Investment . . . . .	248
12.5	Methyl Isobutyl Ketone by Direct Condensation of Acetone Production Costs . . . . .	250
