

Report No. 78

ACRYLONITRILE THERMOPLASTICS

by ROBERT H. SCHWAAR

August 1972

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	3
	General Aspects	3
	Technical Aspects	8
3	INDUSTRY STATUS	13
	High-Nitrile Resins	13
	Standard Oil (Ohio)	13
	Monsanto	15
	Du Pont	16
	Other Producers	16
	Acrylic Multipolymers	17
	Competition Between High-Nitrile Resins and Acrylic Multipolymers	19
	Opportunities for Barrier Resins in Bottles	19
	Opportunities for Barrier Resins in Films	21
4	CHARACTERISTICS AND PROPERTIES OF ACRYLONITRILE THERMOPLASTICS	23
	Barrier Properties	23
	Impact Strength	30
	Transparency	32
	Heat Deflection Temperature	37
	Creep Strength	38
	Waste Disposal Considerations	39
5	CHEMISTRY	43
	Ungrafted Resins	44
	Kinetics of Interpolymerization	44
	Azeotrope Formation in Copolymerization	46
	Mechanism of Graft Polymerization	49
6	BARRIER RESIN FROM ACRYLONITRILE	55
	Review of Processes	55
	Process Development	56
	Processing Sequence	59
	Rubbery Substrate	60
	Graft Polymerization	64
	Polymer Latex Finishing	71
	Polymer Finishing	74

CONTENTS

6	(continued)		
	Process Description		79
	Preparation of Nitrile Rubber Latex		81
	Preparation of Blending Resin Latex or Graft Resin Latex		82
	Continuous Production of Dry Crumb from Mixed Latex		82
	Polymer Blending and Finishing Section		84
	Process Discussion		93
	Plant Capacity		93
	Design Basis		93
	Production of Rubbery Substrate		94
	Graft Latex Production and Blend Latex Production		94
	Continuous Production of Dry Polymer Crumb		97
	Additives		97
	Extrusion		98
	Packaging		99
	Materials of Construction		99
	Cost Estimates		100
	Capital Costs		100
	Production Costs		100
7	BARRIER RESIN FROM METHACRYLONITRILE		111
	Review of Processes		111
	Process Development		115
	Processing Sequence		116
	Rubbery Substrate		117
	Graft Polymerization		118
	Polymer Latex Finishing		124
	Matrix Resin Copolymerization		125
	Polymer Blending and Finishing		131
	Process Description		132
	Preparation of Acrylate Rubber Latex		134
	Preparation of Graft Resin Latex		134
	Continuous Production of Dry Polymer Crumb from Latex		136
	Preparation of Matrix Copolymer by Suspension		
	Polymerization		137
	Polymer Blending and Finishing Section		138
	Process Discussion		153
	Plant Capacity		153
	Design Basis		153
	Production of Rubbery Substrate		153
	Graft Resin Production		153
	Matrix Copolymer Production		155

CONTENTS

7	(continued)	
	Additives	155
	Extrusion	156
	Packaging	157
	Materials of Construction	158
	Cost Estimates	158
	Capital Costs	158
	Production Costs	159
8	ACRYLIC MULTIPOLYMER	169
	Review of Processes	169
	Other Processes	173
	Graft Polymer	173
	Terpolymer	178
	Polymer Blending and Finishing	181
	Process Description	186
	Continuous Production of Terpolymer Solution	186
	Preparation of Graft Resin Latex	187
	Polymer Blending and Finishing Section	189
	Process Discussion	196
	Graft Latex Production	196
	Solvent	197
	Extruder	197
	Packaging	197
	Cost Estimates	198
	Capital Costs	198
	Production Costs	199
9	CONVERSION OF BARRIER RESIN TO FINISHED ARTICLES	209
	Continuous-Extrusion Blow-Molding	211
	Review of Processes	211
	Process Description	217
	Injection Blow-Molding	221
	Review of Processes	221
	Process Description	225
	Cold-Parison Blow-Molding	229
	Review of Processes	229
	Process Description	231
	Process Discussion	238
	Thermoforming	243
	Review of Processes	243
	Process Description	246

CONTENTS

9	(continued)	
Cost Estimates	251
Capital Costs	251
Production Costs	252
APPENDIX A	DESIGN AND COST BASIS	255
APPENDIX B	THE MARKET FOR CARBONATED BEVERAGE CONTAINERS	259
APPENDIX C	DESIGN OF A PLASTIC BOTTLE FOR CARBONATED BEVERAGES	267
APPENDIX D	MOLECULAR ORIENTATION OF FILMS AND BOTTLES	271
APPENDIX E	MEASUREMENT OF BARRIER PROPERTIES	275
APPENDIX F	GENERAL REVIEW OF EMULSION POLYMERIZATION	277
APPENDIX G	EQUIPMENT SUPPLIERS	283
CITED REFERENCES	285
PATENT REFERENCES BY COMPANY	319

ILLUSTRATIONS

6.1	Barrier Resin from Acrylonitrile	85
6.2	Barrier Resin from Acrylonitrile Effect of Plant Capacity on Total Fixed Capital	105
6.3	Barrier Resin from Acrylonitrile Effect of Operating Level and Plant Capacity on Production Cost	109
7.1	Barrier Resin from Methacrylonitrile	141
7.2	Barrier Resin from Methacrylonitrile Effect of Plant Capacity on Total Fixed Capital	163
7.3	Barrier Resin from Methacrylonitrile Effect of Methacrylonitrile Monomer Cost on Production Cost	167
7.4	Barrier Resin from Methacrylonitrile Effect of Operating Level and Plant Capacity on Production Cost	168
8.1	Acrylic Multipolymers Compositions	175
8.2	Production of Acrylic Multipolymer	191
8.3	Acrylic Multipolymer Effect of Plant Capacity on Total Fixed Capital	203
8.4	Acrylic Multipolymer Effect of Operating Level and Plant Capacity on Production Cost	207
9.1	Bottle Production by Continuous-Extrusion Blow Molding . . .	219
9.2	Bottle Production by Injection Blow-Molding	227
9.3	Bottle Production from Cold Parisons by Corpoplast Process .	235
9.4	Corpoplast Cold-Parison Blow-Molding	237
9.5	Packaging of Parisons	241
9.6	Bottle Production from Sheet by Thermoforming and Spin Welding	249

TABLES

2.1	High-Nitrile Thermoplastics and Acrylic Multipolymer Comparison of Processes	5
2.2	High-Nitrile Thermoplastics and Acrylic Multipolymer Comparison of Estimated Capital and Manufacturing Costs . . .	6
2.3	Production of Bottles from Barrier Resin Comparison of Estimated Costs	7
3.1	Acrylic Multipolymer and Clear ABS Comparison of Properties	18
4.1	Comparison of Physical Properties of Acrylonitrile Thermoplastics	24
4.2	Gas Permeation Rates of High-Barrier Polymers	25
4.3	Properties of Transparent Polymers	33
4.4	Heat Distortion Temperatures of Typical Bottle Resins	38
5.1	Reactivity Ratios of Acrylonitrile in Copolymerization	46
6.1	Barrier Resins from Acrylonitrile Patent Summary	57
6.2	Barrier Resin from Acrylonitrile Major Process Equipment and Utilities Summary	85
6.3	Barrier Resin from Acrylonitrile Stream Flows	91
6.4	Barrier Resin from Acrylonitrile Total Capital Investment	103
6.5	Barrier Resin from Acrylonitrile Major Capital Equipment	106
6.6	Barrier Resin from Acrylonitrile Production Costs	107
7.1	Barrier Resins from Methacrylonitrile Patent Summary	113
7.2	Barrier Resin from Methacrylonitrile Major Process Equipment and Utilities Summary	141
7.3	Barrier Resin from Methacrylonitrile Stream Flows	147
7.4	Barrier Resin from Methacrylonitrile Total Capital Investment	161

TABLES

7.5	Barrier Resin from Methacrylonitrile Major Capital Equipment	164
7.6	Barrier Resin from Methacrylonitrile Production Costs	165
8.1	Acrylic Multipolymers Patent Summary	171
8.2	Acrylic Multipolymer Major Process Equipment and Utilities Summary	191
8.3	Acrylic Multipolymer Stream Flows	195
8.4	Acrylic Multipolymer Total Capital Investment	201
8.5	Acrylic Multipolymer Major Capital Equipment	204
8.6	Acrylic Multipolymer Production Costs	205
9.1	Bottle Production by Continuous-Extrusion Blow-Molding Selected List of Equipment Manufacturers	213
9.2	Bottle Production by Continuous-Extrusion Blow-Molding Major Process Equipment and Utilities Summary	219
9.3	Bottle Production by Injection Blow-Molding Selected List of Equipment Manufacturers	223
9.4	Bottle Production by Injection Blow-Molding Major Process Equipment and Utilities Summary	227
9.5	Bottle Production by Cold-Parison Blow-Molding Effect of Molecular Orientation on Physical Properties	230
9.6	Bottle Production from Cold Parisons by Corpoplast Process Major Process Equipment and Utilities Summary	235
9.7	Bottle Production from Sheet by Thermoforming and Spin Welding Major Process Equipment and Utilities Summary	249
9.8	Bottle Production Total Fixed Capital	253
9.9	Bottle Production Conversion Costs	253
