

Report No. 94

**POLYAMIDES OTHER THAN
NYLONS 6 AND 66**

PART I

by YEN-CHEN YEN

November 1974

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

CONTENTS, PART I

1	SUMMARY AND COMMERCIAL ASPECTS	1
	Scope	2
	Aramids	2
	Nylon Fibers	7
	Nylon Resins	9
	Polyamides Other than Nylons and Aramids.	11
	Technical Aspects	12
2 } 3 }	The usual Introduction, Summary, and Industry Status sections are combined in Section 1 of this report.. . . .	15
4	REVIEW OF PROCESSES	17
	Polymerization Processes.	17
	Spinning.	22
	Additives	23
5	ARAMIDS WHOLLY PARA-LINKED.	139
	Review of Processes	143
	Process Description	154
	Process Discussion	170
	Cost Estimates.	171
6	ARAMIDS NOT WHOLLY PARA-LINKED.	183
	Review of Processes	184
	Process Description	199
	Process Discussion	209
	Cost Estimates	209
7	PARTIALLY AROMATIC POLYAMIDES	217
	Review of Products and Processes	217
	A Process for Making Poly(Hexamethylene Terephthalamide).	237
	Process Description	237
	Process Discussion	247
	Cost Estimates	247
	A Process for Making Nylon 3M6,T	251
	Process Description	251
	Process Discussion	259
	Cost Estimates	259

CONTENTS, PART II

8	ALICYCLIC POLYAMIDES	263
	Review of Processes	263
	A Process for Making Nylon PACM,12	278
	Process Description	278
	Process Discussion	287
	Cost Estimates	287
9	ALIPHATIC POLYAMIDES FROM DIAMINES AND DIACIDS	295
	Review of Products and Processes	295
	Process Description	305
	Process Discussion	315
	Cost Estimates	315
10	ALIPHATIC POLYAMIDES OTHER THAN NYLON 12, 11, OR 4 FROM LACTAMS OR AMINO ACIDS	321
	General	321
	Nylon 3	324
	Nylon 7	333
	Nylon 9	334
	Nylon 13	335
	Nylon 2	335
	Nylon 8	336
	Nylon 5	336
	Nylon 10	337
11	NYLON 12	339
	Chemistry	339
	Review of Processes	340
	Process Description	347
	Process Discussion	354
	Cost Estimates	355
12	NYLON 11	359
	Chemistry	359
	Review of Processes	360
	Process Description	360
	Process Discussion	368
	Cost Estimates	368

CONTENTS, PART II

13	NYLON 4	373
	Chemistry	373
	Review of Processes	375
	Process Description	380
	Process Discussion	387
	Cost Estimates	387
14	OTHER POLYAMIDES	391
	Polyamides Containing Heterocyclic Groups	391
	Polyamides from Fatty Acids	392
	Unsaturated Polyamides	392
	Polyamides Containing Hetero Atoms	392
	Polyamides Containing N-Alkoxyalkyl Groups	393
	Copolyamides and Polyamide Blends	393
	Bicomponent Fibers	393
	APPENDIX A DESIGN AND COST BASES	443
	APPENDIX B PHYSICAL AND CHEMICAL DATA	445
	APPENDIX C SOME CONVERSIONS	459
	APPENDIX D NYLON NOMENCLATURE	461
	CITED REFERENCES	463
	PATENT REFERENCES BY COMPANY	615

ILLUSTRATIONS, PART I

5.1	Elongations at Break and Initial Moduli of Para Aramids Compared with Those of Other Polyamides, Glass, and Steel	141
5.2	Tensile Strengths and Initial Moduli of Para Aramids Compared with Those of Other Polyamides, Glass, and Steel	142
5.3	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Flow Sheet	161
5.4	Hexamethylphosphoramide Manufacture Flow Sheet	167
5.5	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Effect of Operating Level and Plant Capacity on Production Cost	182
6.1	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Flow Sheet	203
6.2	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Effect of Operating Level and Plant Capacity on Production Cost	215
7.1	Poly(Hexamethylene Terephthalamide) Resin by Interfacial Polycondensation Flow Sheet	243
7.2	Nylon 3M6,T Chip Manufacture Flow Sheet	255
7.3	Nylon 3M6,T Chip Manufacture Effect of Operating Level and Plant Capacity on Production Cost	262

TABLES, PART I

1.1	World Producers of Aramids and Nylons Other than Nylons 6 and 66	3
1.2	Cost Features of Certain Polyamide Fibers and Chips for Fibers	8
1.3	Cost Features of Certain Nylon Resins	10
4.1	Polyamides by Batch Polymerization Patent Summary	26
4.2	Polyamides by Continuous Polymerization Patent Summary	27
4.3	Polyamides by Bulk Polymerization Patent Summary	35
4.4	Polyamides by Polymerization in a Nonaqueous Medium Patent Summary	36
4.5	Polyamides by Solid Phase Polymerization Patent Summary	37
4.6	Polyamides by Interfacial Processes Patent Summary	38
4.7	Polylactams by Anionic Polymerization Patent Summary	39
4.8	Removal of Monomers and Oligomers from Polyamides Patent Summary	44
4.9	Miscellaneous Catalysts for Polyamides Preparation Patent Summary	45
4.10	Polyamides from Diamines and Dibasic Acids via Derivatives Patent Summary	46
4.11	Polyamides from Diisocyanates Patent Summary	47
4.12	Miscellaneous Processes for Polyamides Preparation Patent Summary	48
4.13	Drying of Polyamides Patent Summary	50
4.14	Production of Polyamide Powder Patent Summary	51
4.15	Recovery and Treatment of Polyamide Waste Patent Summary	52

TABLES, PART I

4.16	Means of Cleaning Equipment for Producing Polyamides Patent Summary	55
4.17	Melt-Spinning of Polyamides Patent Summary	56
4.18	Spin-Drawing of Polyamide Fiber Patent Summary	59
4.19	Spinnerets for Producing Polyamide Fibers Having Noncircular Cross Sections Patent Summary	62
4.20	Solution Spinning of Polyamides Patent Summary	63
4.21	Pigmenting and Delustering of Polyamides Patent Summary	65
4.22	Stabilizers for Polyamides Patent Summary	69
4.23	Antistatic Additives for Polyamides Patent Summary	97
4.24	Additives To Increase Hydrophilicity of Polyamides Patent Summary	115
4.25	Additives To Change Dyeability of Polyamides Patent Summary	116
4.26	Nucleating Agents for Polyamides Patent Summary	122
4.27	Plasticizers for Polyamides Patent Summary	123
4.28	Additives To Facilitate Processing of Polyamides Patent Summary	124
4.29	Additives or Techniques for Increasing Melt Viscosity of Polyamides Patent Summary	126
4.30	Means for Increasing Molecular Weight of Polyamides Patent Summary	127
4.31	Viscosity Stabilizers for Polyamides Patent Summary	129
4.32	Additives for Improving Mechanical Properties of Polyamides Patent Summary	130

TABLES, PART I

4.33	Additives for Improving Transparency of Polyamides Patent Summary	132
4.34	Additives for Improving Flame Retardance in Polyamides Patent Summary	133
4.35	Miscellaneous Additives for Polyamides Patent Summary	136
5.1	Para Aramids Patent Summary	145
5.2	Aromatic Polyhydrazides Patent Summary	151
5.3	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Design Bases and Assumptions	154
5.4	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Major Process Equipment and Utilities Summary	159
5.5	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Stream Flows	165
5.6	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Waste Streams	166
5.7	Hexamethylphosphoramide Manufacture Major Process Equipment and Utilities Summary	167
5.8	Hexamethylphosphoramide Manufacture Stream Flows	169
5.9	Hexamethylphosphoramide Manufacture Total Capital Investment	173
5.10	Hexamethylphosphoramide Manufacture Production Costs	174
5.11	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Total Capital Investment	175
5.12	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Production Costs	177
5.13	Poly(p-Phenylene Terephthalamide) Yarn Heat Treatment Total Fixed Capital	179
5.14	Poly(p-Phenylene Terephthalamide) Heat-Treated Yarn Production Costs	180
5.15	Poly(p-Phenylene Terephthalamide) Yarn Manufacture Comparison of Costs for Different Deniers	181

TABLES, PART I

6.1	Poly(m-Phenylene Isophthalamide) Patent Summary	185
6.2	Aramid Ordered Copolymers Patent Summary	190
6.3	Aramid Limited-Order Copolymers Patent Summary	192
6.4	Other Aramids Patent Summary	194
6.5	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Design Bases and Assumptions	199
6.6	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Major Process Equipment and Utilities Summary.	203
6.7	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Stream Flows	207
6.8	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Waste Streams	208
6.9	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Total Capital Investment	211
6.10	Poly(m-Phenylene Isophthalamide) Yarn Manufacture Production Costs	213
7.1	Polyamides from Diacids Containing Aromatic Groups and Aliphatic Diamines Patent Summary	218
7.2	Polyamides from Aromatic Diacids and Branched Aliphatic Diamines Patent Summary	228
7.3	Polyamides from Aliphatic Diacids and Diamines, Other Than Xylylenediamines, Containing Aromatic Rings Patent Summary	230
7.4	Polyamides from Xylylenediamines Patent Summary	233
7.5	Polyamides from Amino Acids Containing Aromatic Rings Patent Summary	238
7.6	Polyamides from Diamines and Diacids, Both Containing Aryl Rings	239

TABLES, PART I

7.7	Poly(Hexamethylene Terephthalamide) Resin by Interfacial Polycondensation Design Bases and Assumptions	240
7.8	Poly(Hexamethylene Terephthalamide) Resin by Interfacial Polycondensation Major Process Equipment and Utilities Summary	241
7.9	Poly(Hexamethylene Terephthalamide) Resin by Interfacial Polycondensation Stream Flows	245
7.10	Poly(Hexamethylene Terephthalamide) Resin by Interfacial Polycondensation Waste Streams	246
7.11	Poly(Hexamethylene Terephthalamide) Resin by Interfacial Polycondensation Total Capital Investment	248
7.12	Poly(Hexamethylene Terephthalamide) Resin by Interfacial Polycondensation Production Costs	249
7.13	Nylon 3M6,T Chip Manufacture Design Bases and Assumptions	251
7.14	Nylon 3M6,T Chip Manufacture Major Process Equipment and Utilities Summary	253
7.15	Nylon 3M6,T Chip Manufacture Stream Flows	257
7.16	Nylon 3M6,T Chip Manufacture Waste Streams	258
7.17	Nylon 3M6,T Chip Manufacture Total Capital Investment	260
7.18	Nylon 3M6,T Chip Manufacture Production Costs	261
