

Report No. 115

**ENVIRONMENTALLY
DEGRADABLE
POLYMERS**

by **WALTER SEDRIKS**

August 1977

A private report by the

PROCESS ECONOMICS PROGRAM

STANFORD RESEARCH INSTITUTE

MENLO PARK, CALIFORNIA

For detailed marketing data and information, the reader is referred to one of the SRI programs specializing in marketing research. The CHEMICAL ECONOMICS HANDBOOK Program covers most major chemicals and chemical products produced in the United States and the WORLD HYDROCARBONS Program covers major hydrocarbons and their derivatives on a worldwide basis. In addition, the SRI DIRECTORY OF CHEMICAL PRODUCERS services provide detailed lists of chemical producers by company, product, and plant for the United States and Western Europe.

CONTENTS

1	INTRODUCTION	1
2	SUMMARY	5
3	CONTROL OF DEGRADATION	13
	General Considerations	13
	Photodegradation	16
	Process and Mechanisms	17
	Absorption of Light by Polymers	22
	Initiation Reactions	25
	Testing Procedures	34
	Biological Degradation (Biodegradation)	38
	Water Solubility	43
	Review of Patents	43
4	COMMERCIAL DEVELOPMENTS	77
	Europe	78
	Akerlund and Rausing (Sweden)--ENDEPLAST	78
	CdF Chimie (France)	80
	Coloroll Ltd/G. J. Griffin (England)--BYOPLASTIC	80
	Gerald Scott (University of Aston, England)	81
	Tetra Pak (Sweden)	83
	Japan	83
	Asahi Chemical	83
	Chisso Corporation	84
	Denki Kagaku	84
	Japan Synthetic Rubber	84
	Mitsui Toatsu	84
	Nippon Zeon--LIFEL	85
	Sekisui Chemical--ELSEN	85
	Seiwa Chemical	85
	Shinko Jushi	85
	Shiseido	86
	Wada Chemical--LOPO FILM	86
	United States and Canada	86
	Bio-Degradable Plastics, Inc.--STY-GRADE and POLY-GRADE	87
	DeBell & Richardson Inc.	90
	Guillet, J./Van Leer-Ecoplastics Ltd.--ECOLYTE	90
	Miles Laboratories	92
	Princeton Chemical Research--ECOLAN	92
	Princeton Polymer Laboratories (PPL)	92
	Union Carbide--POLYCAPROLACTONE PCL-700	92

CONTENTS

4	COMMERCIAL DEVELOPMENTS (Continued)	93
	Water-Soluble Polymers	93
	Hercules Inc.--KLUCEL	93
	Sumitomo Chemical--Pullulan	93
	Union Carbide--POLYOX	94
	Polyvinyl Alcohol (PVAL)	95
	Acrylamide Polymers	95
5	AGRICULTURAL MULCH FILM	97
	General Background	97
	Market Status	101
	Degradable Film	104
	Summary of Patents	107
	Commercial Developments	112
	CdF Chimie	112
	Chisso Corporation	113
	Princeton Chemical Research--ECOLAN	113
	Gerald Scott--APA	114
	Princeton Polymer Laboratories (PPL)	115
	D. W. Young/Elco Chemicals--POLUTROL	118
	Other Products	118
	Manufacture of Film	119
	Process Description	120
	Process Discussion	122
	Cost Estimates	125
	Capital Costs	125
	Production Costs	127
	Some Cost Comparisons	132
	Conclusions	135
6	POLYBUTENE-1 BY HOMOGENEOUS POLYMERIZATION	139
	General Background	139
	Process Description	142
	Polymerization	147
	Polymer Purification	147
	Solvent Recovery and Feed Purification	148
	Polymer Finishing and Storage	148
	Process Discussion	154
	Catalyst	154
	Reactor Feeds	155
	Reaction	156
	Polymer Purification	158

CONTENTS

6	POLYBUTENE-1 BY HOMOGENEOUS POLYMERIZATION (Continued)	
	Solvent Recovery	159
	Polymer Finishing	159
	Solids Handling	160
	Waste Streams	160
	Materials of Construction	161
	Cost Estimates	162
	Capital Costs	162
	Production Costs	162
	Comparison with Huels Technology	164
	Estimated Sales Value	165
	Conclusions	170
7	DEGRADABLE PLASTICS: THE DEBATE	173
	The Garbage Problem	174
	The Litter Problem	177
	Summary	185
	APPENDIX A DESIGN AND COST BASES	189
	APPENDIX B SOURCES OF VENDOR INFORMATION	193
	CITED REFERENCES	195
	PATENT REFERENCES BY COMPANY	215

ILLUSTRATIONS

3.1	Weathering Data for 2-mil Polyethylene Film with Akerlund and Rausing's ENDEPLAST Additives	37
3.2	Relative Popularity of the Various Types of Additive Systems	46
5.1	Effect of Photoactivator on the Tensile Strength of LDPE Mulching Film Exposed in Israel	116
5.2	Effect of Antioxidant on Embrittlement of LDPE Mulching Film with APA System	117
5.3	Blown Film Production Flow Sheet	223
6.1	Polybutene-1 Homogeneous Polymerization (Witco/Mobil Technology) Flow Sheet	225
6.2	Polybutene-1 Homogeneous Polymerization (Witco/Mobil Technology) Effect of Plant Capacity and Stream Factor on Production Cost	169
7.1	Computed Effect of Various Litter Control Strategies . . .	180
7.2	Computed Effect of Introducing Degradable Packages with Various Lifetimes in 1975	180

TABLES

2.1	Degradable Mulch Film Cost Summary	8
2.2	Cost Comparisons	8
2.3	Polybutene-1 Cost Summary	11
3.1	Environmentally Degradable Polymers Selected References	18
3.2	Environmentally Degradable Polymers Patent Summary	47
5.1	Degradable Agricultural Mulch Films Patent Summary	109
5.2	Blown Film Production, Polybutene-1 Typical Stream Flows and Utilities Consumption	121
5.3	Typical Properties of Polybutene-1 Blown Film	126
5.4	Blown Film Production Capital Costs	129
5.5	Blown Film Process, Polybutene-1 Production Costs	130
5.6	Blown Film Process, LDPE Production Costs	131
5.7	Comparison of Estimated Costs for Degradable Versus Nondegradable Films	133
5.8	Comparison of Estimated Costs for Degradable Films Versus Basic LDPE Film	133
6.1	Typical Physical Properties of Polybutene-1 for General Purpose Piping	141
6.2	Polybutene-1 Reaction and Catalyst Systems Summary of Recent Patents	143
6.3	Polybutene-1 Homogeneous Polymerization Summary of Design Parameters	146
6.4	Polybutene-1 Homogeneous Polymerization (Witco/Mobil Technology) Major Equipment and Utilities Summary	149
6.5	Polybutene-1 Homogeneous Polymerization (Witco/Mobil Technology) Stream Flows	152

TABLES

6.6	Polybutene-1 Homogeneous Polymerization (Witco/Mobil Technology)	
	Total Capital Investment	166
6.7	Polybutene-1 Homogeneous Polymerization (Witco/Mobil Technology)	
	Production Costs	168
7.1	Net Accumulation of Plastics Litter at Strathaird Point, Loch Scavaig, Scotland	179
