AROMATIC PROCESSES

SUPPLEMENT A

by SUSAN M. LEIBY
with contributions by ELAINE CHANG

February 1997

A private report by the
PROCESS ECONOMICS PROGRAM

Menlo Park, California 94025
For detailed marketing data and information, the reader is referred to the following SRI Consulting programs specializing in marketing research:

- The **CHEMICAL ECONOMICS HANDBOOK** Program covers over 1,300 major chemicals and chemical products produced in the United States, Western Europe, and Japan.

- The **WORLD PETROCHEMICALS** Program covers major hydrocarbons and their derivatives on a worldwide basis.

- The **SPECIALTY CHEMICALS UPDATE PROGRAM** covers the business environment and markets in the United States, Western Europe, and Japan for thirty-two specialty chemicals topics.

- The **SRI DIRECTORY OF CHEMICAL PRODUCERS** services provide detailed lists of chemical producers by company, product, and plant for Canada, China, East Asia, Europe, India, Mexico, Middle East, South America and the United States.

- The **HEALTH INDUSTRIES HANDBOOK** covers U.S. markets for 120 classes of pharmaceutical and medical supply/equipment/device products.

In addition, general information on SRI and SRI Consulting activities can be found in the *Chemical Industries Newsletter*, a free bimonthly publication, and by visiting SRI International’s Internet home page (http://www.sri.com) or SRI Consulting’s Internet home page for continuing programs for the chemical industry (http://www-cmrc.sri.com).

Reasonable free inquiries on the subject matter of this report are available to all current PROCESS ECONOMICS PROGRAM subscribers. You may contact the author by fax at (415) 859-5134.

APPENDIX C: CITED REFERENCES ....................................................... C-1
APPENDIX D: PATENT REFERENCES BY COMPANY .......................... D-1
APPENDIX E: PROCESS FLOW DIAGRAMS .......................................... E-1
ILLUSTRATIONS

3.1 Integrated Aromatics Plants—Schematic Block Flow Diagram ............ 3-7
4.1 Solvent Selectivity and Hydrocarbon Solubility .......................... 4-4
4.2 UOP-Shell Sulfolane Aromatics Process ............................ 4-8
4.3 General Flow Scheme for Extractive Distillation ...................... 4-16
5.1 CAROM™ Extraction of Reformate Feedstock Process Flow Diagram .................. E-3
5.2 Gasoline Price versus Octane Number on the U.S. Gulf Coast ........ 5-19
5.3 Monthly Average Prices on the U.S. Gulf Coast. 1993-1995 .......... 5-20
5.4 Monthly Average Price Ratios on the U.S. Gulf Coast. 1993-1995 .... 5-21
7.1 Channel System In ZSM-5 ............................................. 7-5
7.2 MSTDP Process Optimization .......................................... 7-8
7.3 Mobil Selective Toluene Disproportionation Process Process Flow Diagram .................. E-7
7.4 Monthly Average Spot Prices for Xylene ............................ 7-37
7.5 Monthly Spot Prices for Benzene and Toluene on the U.S. Gulf Coast—1993-1995 .... 7-38
7.6 Monthly Spot Prices for Toluene and Mixed Xylenes on the U.S. Gulf Coast—1993-1995 .... 7-39
TABLES

2.1 World Capacity and Production of Benzene, Toluene, and Xylenes—1995 ................................................. 2-1
2.2 World Production of Benzene, Toluene, and Xylenes by Source—1995 .......................... 2-2
2.3 Summary of Cost Estimates for Extraction of Reformate Feedstock ................. 2-7
2.4 Cost Estimate for Selective Toluene Disproportionation ........................................ 2-8
2.5 Cost Estimate for Conventional Toluene Disproportionation ............................... 2-9
3.1 World BTX Production by Source—1995 .......................................................... 3-2
3.2 Estimated Yields During Ethylene Manufacture ............................................. 3-4
3.3 Total World Capacity and Production for BTX—1995 ........................................ 3-10
3.4 Summary of BTX Extraction and Toluene Conversion Capacity—1995 ............ 3-11
3.5 Capacity for BTX from Reformate—1995 .................................................. 3-16
3.6 Capacity for BTX from Pyrolysis Gasoline—1995 ........................................ 3-19
3.7 Capacity for BTX from Toluene Disproportionation—1995 ............................ 3-21
3.8 Capacity for Benzene from Toluene Dealkylation—1995 .................................. 3-22
3.9 Announced BTX Capacity ................................................................. 3-24
3.10 Announced BTX Capacity as of Mid-Year 1996 ........................................ 3-12
4.1 Aromatics Separation from Nonaromatics Patent Summary ........................................... A-3
4.2 Typical Compositions of Feedstocks for Aromatics Recovery ........................... 4-2
4.3 Typical Recovery and Purity of Aromatics Obtained by Liquid Extraction Technology ........................................... 4-3
4.4 Liquid Extraction Processes for the Separation of BTX Aromatics from Hydrocarbon Mixtures ........................................... 4-6
4.5 Comparison of Technologies for the Recovery of Aromatics from Wide-Range Feedstocks ........................................... 4-13
4.6 Extractive Distillation Processes for the Separation of BTX Aromatics from Hydrocarbon Mixtures ........................................... 4-14
4.7 Comparison of Solvent Properties .......................................................... 4-15
5.1 Carom Extraction of Reformate Feedstock  
Design Basis ....................................................... 5-2

5.2 Carom Extraction of Reformate Feedstock  
Stream Flows ...................................................... 5-5

5.3 Carom Extraction of Reformate Feedstock  
Major Equipment ................................................... 5-6

5.4 Carom Extraction of Reformate Feedstock  
Utilities Summary ................................................... 5-8

5.5 Process Effluents from Carom Extraction Units .............................................. 5-11

5.6 Carom Extraction of Reformate Feedstock  
Total Capital Investment ............................................. 5-14

5.7 Carom Extraction of Reformate Feedstock  
Capital Investment by Section ........................................ 5-15

5.8 Carom Extraction of Reformate Feedstock  
Production Costs ................................................... 5-16

5.9 Carom Extraction of Reformate Feedstock  
Direct Costs by Section ............................................. 5-18

6.1 GT-BTX Extractive Distillation of Reformate Feedstock  
Design Basis ....................................................... 6-2

6.2 GT-BTX Extractive Distillation of Reformate Feedstock  
Stream Flows ...................................................... 6-4

6.3 GT-BTX Extractive Distillation of Reformate Feedstock  
Major Equipment ................................................... 6-5

6.4 GT-BTX Extractive Distillation of Reformate Feedstock  
Utilities Summary ................................................... 6-7

6.5 Process Effluents from GT-BTX Extractive Distillation Unit .............................................. 6-10

6.6 GT-BTX Extractive Distillation of Reformate Feedstock  
Total Capital Investment ............................................. 6-13

6.7 GT-BTX Extractive Distillation of Reformate Feedstock  
Capital Investment by Section ........................................ 6-14

6.8 GT-BTX Extractive Distillation of Reformate Feedstock  
Production Costs ................................................... 6-15
