Waterborne Commodity Intelligence: LNG

IHS Energy's LNG Waterborne Commodity Intelligence services leverage unique capabilities and methods to provide data and analysis of the global waterborne LNG market of unparalleled accuracy and detail.
Waterborne Live LNG

Monitor the most complete, detailed and accurate view of the global waterborne LNG market, with continual updates.

Aggregated Data Analysis
- Import Volumes – Monthly LNG imports + forecast data
- Imports by Source - Breakdown of monthly imports by country source
- Inbound Volumes – Volumes on the water, in 5-day increments, out to 40 days
- Export Volumes – Monthly export volumes by country of destination
- Supply Matrix - Comprehensive view of import destinations vs. export sources

Continually-Updated Spot Economics
- Spot Landed Prices
- Freight Rates, Netback Table

Expert Analysis
- Focused analysis providing insight into key trends and events
- Immediate alerts of key intelligence picked up by our analysis

Voyage Record Detail from 2003 forward

Waterborne LNG Production Tracker

Keep tabs on global liquefaction volumes, capacity utilization and geographic distribution of supply to the global market. Monitor plant outages and get updates on scheduled and unscheduled outages and maintenance.

**Global Production data**
- Production volumes for all countries globally
- Plant-level data available

**Production Destination**
- Track destination of LNG production down to the Country level
- Specify either country or production plant as a source

**Production vs. Nameplate Capacity**
- Monthly analysis of actual production vs. nameplate potential
- Viewable at either regional or country level aggregation

**Headline Analysis Notes of Interest**
- Expert analysis of waterborne LNG production globally
- Published monthly

---

**Who uses Waterborne Commodity Intelligence LNG services?**

**Commodity Traders**
Traders use Waterborne Commodity Intelligence to monitor the spot market in real time, to be the first to identify inbound tankers at all ports, view the menu of tankers coming off charter, and obtain time-sensitive market alerts.

**Research Analysts/ Strategic Planners**
Analysts and planners use Waterborne Commodity Intelligence to analyze global LNG flows, monitor pricing trends, and drill down into voyage-specific commercial detail to better understand market dynamics, tanker fleet utilization patterns, and the commercial activity of other market participants.
Key Differentiators

Expert-Vetted Information produces Unparalleled Accuracy

Voyage records are never simply populated from tanker tracker data feeds with automated calculations. Instead, IHS LNG experts with deep knowledge of the market and access to proprietary information sources vet every single voyage record. Inaccuracies common to tanker tracker-sourced data are corrected, and commercial detail on the voyage is added. All aggregated LNG data provided to clients have been bottom-up calculated from these voyage-specific data records, and the underlying voyage information is always available for inspection.

We are the only data provider confident enough to publically demonstrate the accuracy of our data via annual comparisons with GIIGNL (The International Group of Liquefied Natural Gas Importers) statistics. Each year since 2011 IHS has subjected its waterborne LNG data to a rigorous comparison with GIIGNL reporting, and for each of these years we have found less than 1% difference in our volumetric data. We view the transparent presentation of our comparisons as critical to validating for clients the extreme accuracy provided by our unique methods whereby IHS LNG experts examine and confirm the details of each and every LNG shipment IHS Waterborne Commodity Intelligence reports.

Ground Intelligence Collection

For decades, our LNG analysts have maintained relationships with market participants throughout the industry: traders, producers, buyers, port authorities, and brokers. Via this proprietary network, IHS analysts obtain detailed market intelligence that is unavailable anywhere else. This unique vessel-level commercial detail is provided directly to clients via searchable voyage records. It is often critical to understanding hidden or emerging trends in the data, which our experts also present for clients in time-sensitive analytical reports.

Part of IHS Energy’s Comprehensive LNG Product Portfolio

IHS Energy produces a full range of LNG market analysis services, and Waterborne Commodity Intelligence LNG products fit seamlessly into that product portfolio. Along with our detailed waterborne LNG market analysis and data, subscribers can choose to receive:

- **LNG Strategic Research & Forecast Service**: Long-term scenario analysis and forecasting.
- **LNG Value Chain & Markets Service**: Liquefaction project profiles, country regasification outlooks, country profiles, company profiles.
- **Gas Competition Service**: Analysis of the global gas strategies of 50 companies.
